Page 1

1. Disease Etiology

When Mary's paternal grandmother, Earlene, is informed that she has a 7-year-old granddaughter, she immediately agrees to care for Mary. Earlene is a waitress and lives alone in a middle-class neighborhood in a small town about 85 miles from where Mary currently lives. Before placing Mary in a new home, CPS evaluates Earlene's physical, financial, and psychological ability to care for Mary. Earlene is not familiar with SCA. A nurse from CPS meets with her to discuss Mary's health condition. Earlene says to the nurse, "I have heard of sickle cell anemia, and I know it can be very bad, but I don't know exactly what it is."

2. 1.ID: 6975182549

What is the best response by the nurse to Earlene's statement?

- A. ☐ "I have some written material that will explain all about the disease."
Providing the grandmother with written material is indicated, but the nurse should first provide another response to Earlene's statement.
- B. ☐ "It is a disease of the blood that requires taking medication every day."
There is no daily medication that will prevent a sickle cell crisis or cure SCA.
- C. ☐ "Mary will probably have episodes of severe joint pain and will need to be hospitalized."
This response does not provide the initial information that Earlene needs to best understand the disease.
- D. ☒ "Red blood cells become 'C' shaped, stiff, and sticky, which blocks the blood vessels."
Correct
Sickle cell anemia is a disorder of the red blood cells characterized by abnormally shaped red cells that block and damage blood vessels leading to oxygen deprivation, pain, anemia, serious infections, and damage to vital organs. 

Correct

Awarded 1.0 points out of 1.0 possible points.

3. Earlene listens attentively to the nurse discuss Mary's condition and what she must do to care for her. After reviewing the needed care, the nurse asks the grandmother if she has any other questions. Earlene asks, "How did Mary get this awful disease?"

4. 2.ID: 6975182547

How should the nurse respond?
