Philips, 1987-06-26 Most studies of gender differences in language use have been undertaken from exclusively either a sociocultural or a biological perspective By contrast this innovative volume places the analysis of language and gender in the context of a biocultural framework examining both cultural and biological sources of gender differences in language as well as the interaction between them The first two parts of the volume on cultural variation in gender differentiated language use comparing Western English speaking societies with societies elsewhere in the world The essays are distinguished by an emphasis on the syntax rather than style or strategy of gender differentiated forms of discourse but also often carry out the same forms differently through different choices of language form These gender differences are shown to be socially organized although the essays in Part I also raise the possibility that some cross cultural similarities in the ways males and females differentially use language may be related to sex based differences in physical and emotional makeup Part III examines the relationship between language and the brain and shows that although there are differences between the ways males and females process language in the brain these do not yield any differences in linguistic competence or language use Taken as a whole the essays reveal a great diversity in the cultural construction of gender through language and explicitly show that while there is some evidence of the influence of biologically based sex differences on the language of women and men the influence of culture is far greater and gender differences in language use are better accounted for in terms of culture than in terms of biology The collection will appeal widely to anthropologists psychologists linguists and other concerned with the understanding of gender roles *Gender and Language Theory and Practice* Lia Litosseliti, 2014-02-04 The book introduces both theoretical and applied perspectives identifying and explaining the relevant frameworks and drawing on a range of activities examples of how gender is constructed in discourse The book is divided into three parts Part I covers the historical background to the study of gender

and language moving on through past theoretical approaches to a discussion of current debates in the field with particular emphasis on the role of discourse analysis In Part II gender is examined in context with chapters focussing on gender and language in education the mass media and the workplace Finally Part III briefly looks at key principles and approaches to gender and language research and includes activities study questions and resources for teachers in the field Rich with examples and activities drawn from current debates and events this book is designed to be appealing and informative and will capture the imaginations of readers from a range of backgrounds and disciplines

Brinkman s Titel catalohus van de gedurende 1901 1910 1956 1960 Title varies slightly **Language and Gender Research** Joanne Winter,1993 *A Beginner's Guide to Language and Gender* Allyson Julé,2008 This textbook offers an accessible introduction to the study of gender and language use for those new to the subject The book introduces the theoretical and practical perspectives including relevant frameworks necessary to understand ways in which language interacts with gender sex in various settings *Language and Gender - Is There a Gender Gap in Language?* Bettina Hanke,2011-11 Seminar paper from the year 2003 in the subject English Language and Literature Studies Linguistics grade 2 0 B Humboldt University of Berlin Anglistics American Studies course The linguistic situation in the USA 7 entries in the bibliography language English abstract The belief in sex differences has a long tradition Researches of social scientists have helped to create and confirm this belief and have helped to develop theories which stress differences rather than similarities Robin Lakoff was one of the first linguists who proposed that women s speech style is a powerless style She introduced the term women s language which implies that women and men speak different languages Lakoff and others have claimed that differences in male and female language have their source in early childhood socialisation The assertiveness training movement which emerged in the 1970s was first established to help people who have communication problems and was later designed especially for women to solve their alleged problems of speech style and male female communication In the 1980s another approach gained popularity The origins lie in the work of the linguist John Gumperz The two cultures approach maintains that communication between women and men is communication across cultures because the reasons for misunderstanding between them are similar to those of ethnic groups More recent works of Elizabeth Aries and Mary Crawford challenge these approaches and demonstrate that similarities between men and women are far greater than differences In this paper I want to discuss several approaches to gender differences and try to answer the questions whether there are differences in male female communication and what the causes are for these differences
