The ASQ Supply Chain Management Primer James P. Russell,2013-11-27 This primer was written to promote the application of basic and sound supply chain management principles It was written for a global audience of practitioners and their managers Authors and reviewers were chosen from around the world to capture these accepted methods used in national and international commerce Most of the described methods come from decades of use in quality management programs They are equally important when managing for environment safety security and sustainability They are basic The global economy has

presented both a challenge and an opportunity for organizations to better manage their supply chains. An organization's supply chain has come to be viewed as more like a supply web because an organization has a complex network of customers, distributors, wholesalers, suppliers, first tier, second tier, and sometimes third tier, and includes logistics, transportation, and warehousing. This primer draws content from experts in the field and was blended into a useful tool for you to use managing your organization's supply chain. It covers key supply chain topics like supply chain and logistics management processes, defining organizational needs and requirements, identifying supply network sources, building relationships, awarding contracts, and managing supplier performance. Creating an effective supply chain is key to staying ahead in today's complex global economy. This primer provides the tools, guidance, and examples to help maximize business performance and create competitive advantage for your organization.

Construction Management Eugenio Pellicer, Víctor Yepes, José C. Teixeira, Helder P. Moura, Joaquín Catalá, 2013-12-31. The management of construction projects is a wide ranging and challenging discipline in an increasingly international industry facing continual challenges and demands for improvements in safety, in quality, and cost control, and in the avoidance of contractual disputes. Construction Management grew out of a Leonardo da Vinci project to develop a series of Common Learning Outcomes for European Managers in Construction. Financed by the European Union, the project aimed to develop a library of basic materials for developing construction management skills for use in a pan European context. Focused exclusively on the management of the construction phase of a building project from the contractor's point of view, Construction Management covers the complete range of topics of which mastery is required by the construction management professional for the effective delivery of new construction projects. With the continued internationalisation of the construction industry, Construction Management will be required reading for undergraduate and postgraduate students across Europe.
