La enseñanza de la psicología en programas de pregrado en Colombia Sonia Carrillo, Karen Ripoll, 2024-03-01 El objetivo principal de la exhaustiva investigación que recogen estas páginas es ofrecer una descripción comparativa de las características de la enseñanza de diversas asignaturas de Psicología en el país En particular se seleccionaron asignaturas en tres áreas

de formación específicas que corresponden a las propuestas en el Modelo Bogotá para la formación de psicólogos a nivel de pregrado formación básica investigativa y profesional. Un equipo de psicólogos expertos en las respectivas áreas de enseñanza lidera los procesos de recolección y análisis de la información y son estos mismos expertos quienes escribieron los capítulos que componen el libro. Otro objetivo no menos relevante es que los hallazgos de la investigación motiven a los lectores a reflexionar sobre el quehacer docente en su especialidad y a plantearse preguntas de investigación sobre cómo mejorar la calidad de la formación en Psicología en Colombia y quizás también en la región latinoamericana. Hace un llamado a los directores de departamentos y decanos de facultades de Psicología a promover un diálogo en sus instituciones educativas sobre la importancia de una enseñanza de la Psicología que conduzca a establecer y consolidar una cultura que reconozca y estimule la importancia de la investigación sobre docencia en sus contextos educativos.

La tabla rasa Steven Pinker, 2003-12. La concepción que podamos tener de la naturaleza humana afecta a todos los aspectos de nuestra vida desde la forma en que educamos a nuestros hijos hasta las ideas políticas que defendemos. Sin embargo en un momento en que la ciencia está avanzando espectacularmente en estos temas muchas personas se muestran hostiles al respecto. Temen que los descubrimientos sobre los patrones innatos del pensar y el sentir se puedan emplear para justificar la desigualdad subvertir el orden social anular la responsabilidad personal y confundir el sentido y el propósito de la vida. En *La tabla rasa* Steven Pinker explora la idea de la naturaleza humana y sus aspectos emocionales y políticos. Demuestra que muchos intelectuales han negado su existencia al defender tres dogmas entrelazados: la tabla rasa, la mente no tiene características innatas, el buen salvaje. La persona nace buena y la sociedad la corrompe y el fantasma en la máquina: todos tenemos un alma que toma decisiones sin depender de la biología. Cada dogma sobrelleva una carga política y por eso sus defensores se obsesionan en tácticas desesperadas para desacreditar a los científicos que los cuestionan. Pinker aporta calma y serenidad a estos debates al mostrar que la igualdad, el progreso, la responsabilidad y el propósito nada tienen que temer de los descubrimientos sobre la complejidad de la naturaleza humana. Con un razonamiento claro sencillez en la exposición y ejemplos procedentes de la ciencia y la historia el autor desmonta incluso las amenazas más inquietantes. Y demuestra que un reconocimiento de la naturaleza humana basado en la ciencia y el sentido común lejos de ser peligroso puede ser un complemento a las ideas sobre la condición humana que
