Antitrust Law and International Air Transport Angela Cheng-Jui Lu,2003-01-01 This new study takes a keen look at the
problems facing the international community due to conflicts arising from applications of varying competition laws by
different competition authorities to international airline alliances As a result of privatisation deregulation liberalisation and
globalisation international air carriers form alliances with one another in order to cope with growing competition in the
international air transport market This book clearly provides an introduction to the background to and origin of airline
alliances different models of alliances and the related anti competitive practices resulting from existing international airline
alliances The potential anti competitive practices resulting from these cross border alliances trigger a great deal of concern
from various competition authorities Thus this study goes on to provide a detailed analysis regarding the relevant EC
competition law and US antitrust law and their applications to alliance activities The comparison of different applications of
EC competition law and US antitrust law to international airline alliances provides leading research results first hand In the
conclusion the essential elements regarding establishing a level playing field in the international air transport market are
identified and the author provides possible solutions for the harmonisation of different applications of competition law to
