Complex Systems Design & Management Daniel Kroh, Lefei Li, Xinguo Zhang, Junchen Yao, Mengyu Guo, 2023-09-27. This book contains all refereed papers accepted during the 14th International Conference on Complex Systems Design Management CSD M 2023 that took place in Beijing People's Republic of China by the end October 2023. Mastering complex systems requires an integrated understanding of industrial practices as well as sophisticated theoretical techniques and tools. This explains the creation of an annual go between European and Asian forum dedicated to academic researchers and industrial actors working on complex industrial systems architecting modeling and engineering. These proceedings cover the most recent trends in the emerging field of complex systems both from an academic and professional perspective. A special focus was put this year on New Trends in Complex Systems Engineering. The CSD M series of conferences were initiated under the guidance of CESAM Community in Europe managed by CESAMES. Its Asian version took place in Singapore for three consecutive sessions during 2014 and 2018. The fourth Asian edition was held in Beijing in hybrid with the Chinese Society of Aeronautics and Astronautics CSAA as the co organizer in 2021. Since 2023 its European and Asian conferences merge into one taking place in China and Europe in turn. CESAM Community aims in organizing the sharing of good practices in systems architecting and model based systems engineering MBSE and certifying the level of knowledge and proficiency in this field through the CESAM certification. The CESAM systems architecting and model based systems engineering MBSE certification is especially currently the most disseminated professional certification in the world in this domain through more than 3 000 real complex system development projects on which it was operationally deployed and around 10 000 engineers who were trained on the CESAM framework at international level.
