Megatrends und ihre Implikationen für die Logistik Fontius, Jörn, 2014-01-23 Megatrends können aufgrund ihrer tief greifenden und langfristig anhaltenden Veränderungen als Ausgangsbasis für globalwirtschaftliche Entwicklungen und Rahmenbedingungen gesehen werden an denen sich Unternehmen orientieren müssen Die Logistik als ganzheitlich integrierende Netzwerkfunktion nimmt eine zunehmend wichtigere Rolle ein indem sie sich zu einem entscheidenden Differenzierungsmerkmal im Wettbewerb entwickelt Um dieser Aufgabe gerecht zu werden muss sie sich den sich ständig verändernden externen Bedingungen stellen Das in dieser Arbeit betrachtete Forschungsdefizit besteht darin dass die Identifikation der Megatrends und ihrer Einflüsse auf die Logistik aufgrund einer Vielzahl existierender Entwicklungen sowie teilweise gegenläufiger Auswirkungen in einem Wirkmodell und daraus ableitbare Implikationen weder in der Literatur noch in der Praxis verfügbar ist Ziel der Arbeit ist es die für die Logistik relevanten aktuellen langfristigen Entwicklungen zu identifizieren zu systematisieren sowie deren Wirkungen auf die Logistikstrategie von Unternehmen aufzuzeigen Das Forschungsvorhaben wird durch drei primäre Forschungsfragen definiert in denen 1 nach den globalen gesamtwirtschaftlichen Megatrends 2 nach deren Wirkung auf die Logistik und 3 nach den Anpassungsmöglichkeiten der Logistik auf die Wirkungen der Megatrends gefragt wird Zur Bearbeitung des Forschungsgegenstandes wurden zunächst die konzeptionellen Grundlagen sowie das forschungstheoretische Fundament der Arbeit gelegt Darauf aufbauend wurden auf Basis eines ausführlichen Literaturberblicks vier vorherrschende Megatrends Globalisierung Innovation Nachhaltigkeit Nachfrageverhalten identifiziert Anschließend wurde unter Einbezug ressourcenorientierter situationsorientierter sowie systemtheoretischer Ansätze sowie unter Einbezug praxisorientierter Literatur theoriegeleitet die Wirkungszusammenhänge hergeleitet So konnten elf Treiber der Megatrends identifiziert und mit den Handlungsfeldern der Logistik im Sinne einer Systematisierung in Bezug gebracht werden Die Bestätigung der

identifizierten Megatrends sowie der Wirkungszusammenhänge erfolgte anhand einer qualitativen Inhaltsanalyse mit neun repräsentativen und branchen bergreifenden Experteninterviews Die Ableitung der Handlungsmöglichkeiten ist durch eine strukturierte Herleitung aus der Theorie sowie eine anschließende Bestätigung der Praxis erfolgt Ergebnis der Arbeit ist ein empirisch bestätigter Ansatz zum Aufzeigen der Wirkungszusammenhänge von Megatrends auf die Logistik Auch wenn Intensität und Wirkrichtungen der Megatrends unterschiedlich sind konnte zusammenfassend festgestellt werden dass sich die direkten Konsequenzen der Megatrends durch eine Steigerung der Komplexität charakterisieren lassen Es ließen sich drei dominante Strategien zur Begegnung dieser Herausforderungen identifizieren eine stärkere Flexibilisierung der gesamten Logistikkette eine Intensivierung der Kooperationen über Unternehmensgrenzen hinweg sowie eine stärkere Dezentralisierung der Entscheidungskompetenzen Ein erfolgreicher Umgang der Praxis mit den Wirkungen der Megatrends auf die Logistik erfordert somit eine konsequente End-to-End Betrachtung innerhalb der gesamten Wertschöpfungskette und umfasst damit alle direkten und indirekten Beteiligten einer Logistikkette Due to the far reaching and long lasting changes they set in motion megatrends can be seen as a starting point for global economic developments and framework conditions towards which companies have to gear their activities Logistics plays an ever more important role in this context and is fast becoming a decisive distinguishing feature in the competitive arena Ongoing change is a fundamental characteristic of logistics and calls for permanent reinvention and reorientation In view of the many current developments and their sometimes counteracting effects the task of identifying megatrends and their impacts on logistics is complex and difficult There are neither in literature nor in practice any consensus as to what constitutes a megatrend nor are the effects of megatrends clear The aim of this paper is to identify systematize and assess the current long term developments that are of relevance in this respect and to outline their effects on logistics This realisation paved the way for the following three primary research questions 1 What are the global macroeconomic megatrends 2 How can we determine the effects of these megatrends on corporate logistics 3 How can companies adapt to allow for the effects of these megatrends on their logistics To address and answer the questions the first task was to define the conceptual basis and the theoretical research foundation for the paper Building on this four prevailing megatrends globalisation innovation sustainability demand patterns were identified based on an extensive review of the literature A first theory driven effect model was then derived using resource oriented situation oriented and system theory approaches This model included eleven megatrend drivers which were in turn linked with relevant fields of logistics activity In order to answer the research questions the specifics of the effect model were defined based on nine expert interviews logistics decision makers in German industrial companies During the course of the interviews it was possible to confirm the megatrends previously analysed in the literature and their eleven drivers The effects of these megatrends on logistics were then determined Moreover it was possible to identify 13 relevant fields of logistics activity that are affected by the megatrends Even though the intensity and effect directions of megatrends differ it was

possible to determine by way of summary that the direct impact of megatrends is to increase overall complexity Three dominant strategies to meet this challenge were identified greater flexibilisation of the entire supply chain more intensive cooperation across company boundaries and greater decentralisation of decision making powers This means that successful management of the effects of megatrends on logistics requires systematic end to end analysis of the entire value added chain and therefore involves all the direct and indirect participants in a supply chain

Network Analysis With Applications, 4/E (With Cd) Stanley, 2003-09 A Unique Feature Of The Book Is That The First Two Chapters Provide A Mini Course In Basic Resistive Circuit Analysis For The Purpose Of Strengthening The Reader S Background It Is An In Depth Study Of The Basic Circuit Theorems And Network Analysis Methods With The Treatment Limited To Those Concepts Essential For Advanced Study A Reader Without A Formal Electrical Background Could Conceivably Acquire A Sufficient Background From These Chapters To Deal With The Remainder Of The Book
