ABOUT THE BOOK Do any of the following problems sound familiar to you I just don't know where to start studying I feel overwhelmed by the information I've bought all the CBT style videos and books and have even been on a course but I don't feel ready to take the exam and I don't know if I ever will I've been studying for a long time now but I haven't booked the exam yet because I just don't feel ready For every ten students who start out towards the CCNA qualification nine quit They don't quit because of laziness but because they became overwhelmed with information and didn't even know where to start They sat down to study from one of the big name manuals and half an hour later found themselves staring blankly at the same page Can you imagine how frustrating that feels You see most authors throw you in at the deep end and expect you to get on with it They forget that you have a full time job a long journey back home family commitments and any number of challenges going on in your life The last thing you have time for is to write out a detailed study plan with plenty of review sessions If only somebody could tell you what to study each day every day If only you could open your study guide and see which bit of theory to read which lab to do and which exam to take You could then get on with the task of studying and getting that exam nailed This is where Cisco CCNA in 60 Days comes in Written in response to feedback from thousands of students using my online CCNA in 60 days program my classroom courses and my other online Cisco training websites this book is the final piece in the studying puzzle
