Interrogating Muslims Schirin Amir-Moazami, 2022-06-30 This book interrogates the patterns and discursive structures that have generated the seeming urgency of Muslims integration Focusing on Germany it problematizes the grounds on which politics of integration are justified and reasoned upon and thereby investigates divergent operations of power vis vis Muslims and Islam in a formally liberal secular society The integration paradigm in Germany has been predicated on an imperial knowledge regime in which Islam figures as the external friend or enemy of an imagined Christian secular This book analyzes three kinds of integration practices as symptomatic sites for the multifaceted dimensions of power in this paradigm the scientific measurement of Muslims degrees of integration which are correlated with their degrees of religiosity the politics of recognition promoted by state organized dialogue with Muslims and the threat of sanction found in the regulations of citizenship and explicitly in citizenship tests Centrally the book argues that the paradigm of integration navigates between

universalist claims and particularistic racial and religious re enactments of a secular nation state framework at moments in which this very framework is crumbling

Defending Assessment Security in a Digital World Phillip Dawson, 2020-10-26. *Defending Assessment Security in a Digital World* explores the phenomenon of e cheating and identifies ways to bolster assessment to ensure that it is secured against threats posed by technology. Taking a multi disciplinary approach, the book develops the concept of assessment security through research from cybersecurity, game studies, artificial intelligence, and surveillance studies. Throughout, there is a rigorous examination of the ways people cheat in different contexts and the effectiveness of different approaches at stopping cheating. This evidence informs the development of standards and metrics for assessment security and ways that assessment design can help address e cheating. Its new concept of assessment security both complements and challenges traditional notions of academic integrity. By focusing on proactive, principles based approaches, the book equips educators, technologists, and policymakers to address both current e cheating as well as future threats.

Mobility Citizenship Chris Moreh, 2025-01-31. This book aims to trace the development of a new conception of mobility citizenship in Europe, historically, demographically, and experientially. To this aim, it adopts a constellationist approach applied to the intra European mobility space and uses the case studies of Hungarian and Romanian migration to the United Kingdom to develop a multidimensional, meso level comparative empirical analysis of mobility citizenship constellations. The main theoretical proposition of the book is that citizenship has undergone a noticeable change in meaning and valuation, with mobility rights becoming a more central component in the structure of opportunities it provides citizens. The logic of mobility citizenship is thus changing long held perceptions around the social functions of citizenship and consequently the nature of contemporary transnational society.
