Coda Workbook

Alexandra Katehakis

Coda Workbook :

Music Fundamentals Sumy Takesue, 2017-09-22 Music Fundamentals A Balanced Approach Third Edition combines a textbook and integrated workbook with an interactive website for those who want to learn the basics of reading music. Intended for students with little or no prior knowledge of music theory, it offers a patient approach to understanding and mastering the building blocks of musical practice and structure. Musical examples range from Elvis Presley songs to Filipino ballads to Beethoven symphonies, offering a balanced mixture of global classical and popular music. The new edition includes additional vocabulary features and review exercises, additional musical selections, and 1, 2, or 3 hand rhythmic exercises. The addition of guitar tablature, a revised text design that more clearly designates the different types of exercises, and makes the Workbook pages easier to write on. An improved companion website with added mobile functionality. The author's balanced approach to beginning music theory engages student interest while demonstrating how music theory concepts apply not only to the Western classical canon but also to popular and world music. With the beginner student in mind, Music Fundamentals A Balanced Approach Third Edition is a comprehensive text for understanding the foundations of music theory. **Sex**

Addiction as Affect Dysregulation Alexandra Katehakis, 2016-09-20 Examining the neurobiological underpinnings of sex addiction. Neuroaffective science studying the integrated development of the body, brain, and mind has revealed mechanisms linking psychological and biological factors of mental disorders, including addiction. Indeed, its paradigm-shifting theoretical umbrella demonstrated that substance and behavioral dependencies share identical neurobiological workings, and thus that problematic repetitive behaviors are genuine addictions, a state increasingly understood as a chronic brain disorder. Clinical experience strongly suggests that sex addiction (SA) treatment informed by affective neuroscience, the specialty of Alexandra Katehakis, proves profoundly transformative. Katehakis's relational protocol presented here blends neurobiology with psychology to accomplish full recovery. Her Psychobiological Approach to Sex Addiction Treatment (PASAT) joins therapist and patient through a relationally based psychotherapy, a holistic dyadic dance that calls on the body, brain, and mind of both. Written with clarity and compassion, this book integrates cutting-edge research, case studies, verbatim session records, and patient writings, and art. Katehakis explicates neurophysiological, psychological, and cultural forces priming and maintaining SA, then details how her innovative treatment restores patients' interpersonal, sexual, and spiritual relationality. **Caretaker**
