

The Complexity of Identity: “Who Am I?”

Beverly Daniel Tatum

The concept of identity is a complex one, shaped by individual characteristics, family dynamics, historical factors, and social and political contexts. Who am I? The answer depends in large part on who the world around me says I am. Who do my parents say I am? Who do my peers say I am? What message is reflected back to me in the faces and voices of my teachers, my neighbors, store clerks? What do I learn from the media about myself? How am I represented in the cultural images around me? Or am I missing from the picture altogether? As social scientist Charles Cooley pointed out long ago, other people are the mirror in which we see ourselves.¹

This “looking glass self” is not a flat one-dimensional reflection, but multidimensional. How one’s racial identity is experienced will be mediated by other dimensions of one-self: male or female; young or old; wealthy, middle-class, or poor; gay, lesbian, bisexual, transgender, or heterosexual; able-bodied or with disabilities; Christian, Muslim, Jewish, Buddhist, Hindu, or atheist. ...

What has my social context been? Was I surrounded by people like myself, or was I part of a minority in my community? Did I grow up speaking standard English at home or another language or dialect? Did I live in a rural county, an urban neighborhood, a sprawling suburb, or on a reservation?

Who I am (or say I am) is a product of these and many other factors. Erik Erikson, the psychoanalytic theorist who coined the term *identity crisis*, introduced the notion that the social, cultural, and historical context is the ground in which individual identity is embedded. Acknowledging the complexity of identity as a concept, Erikson writes,

We deal with a process “located” in the core of the individual and yet also in the core of his communal culture.... In psychological terms, identity formation employs a process of simultaneous reflection and observation, a process taking place on all levels of mental functioning, by which the individual judges himself in the light of what he perceives to be the way in which others judge him in comparison to themselves and to a typology significant to them.²

Triggered by the biological changes associated with puberty, the maturation of cognitive abilities, and changing societal expectations, this process of simultaneous reflection and observation, the self-creation of one’s identity, is commonly experienced in the United States and other Western societies during the period of adolescence.³ Though the foundation of identity is laid in the experiences of childhood, younger children lack the physical and cognitive development needed to reflect on the self in this abstract way. The adolescent capacity for self-reflection (and resulting self-consciousness) allows one to ask, “Who am I now?” “Who was I before?” “Who will I become?” The answers to these questions will influence choices about who one’s romantic partners will be, what type of work one will do, where one will live, and what belief system one will embrace. Choices made in adolescence ripple throughout the lifespan.

Navigating the Future Geraldine Downey,Jacquelynne Eccles,Celina Chatman,2006-01-12 Psychologists now understand that identity is not fixed but fluid and highly dependent on environment In times of stress conflict or change people often adapt by presenting themselves in different ways and emphasizing different social affiliations With changing demographics creating more complex social groupings it is important to understand the costs and benefits of the way social groups are categorized and the way individuals understand cope with and employ their varied social identities Navigating the Future edited by Geraldine Downey Jacquelynne Eccles and Celina Chatman answers that call with a wealth of empirical data

and expert analysis Navigating the Future focuses on the roles that social identities play in stressful challenging and transitional situations Jason Lawrence Jennifer Crocker and Carol Dweck show how the prospect of being negatively stereotyped can affect the educational success of girls and African Americans making them more cynical about school and less likely to seek help The authors argue that these issues can be mitigated by challenging these students educationally expressing optimism in their abilities and emphasizing that intelligence is not fixed but can be developed The book also looks at the ways in which people employ social identity to their advantage J Nicole Shelton and her co authors use extensive research on adolescents and college students to argue that individuals with strong positive connections to their ethnic group exhibit greater well being and are better able to cope with the negative impact of discrimination Navigating the Future also discusses how the importance and value of social identity depends on context LaRue Allen Yael Bat Chava J Lawrence Aber and Edward Seidman find that the emotional benefit of racial pride for black adolescents is higher in predominantly black neighborhoods than in racially mixed environments Because most people identify with more than one group they must grapple with varied social identities using them to make connections with others overcome adversity and understand themselves Navigating the Future brings together leading researchers in social psychology to understand the complexities of identity in a diverse social world
