100 Soa Questions Asked And Answered:

100 SOA Questions Kerrie Holley, Ali Arsanjani, 2010-11-12 100 SOA Questions brings together authoritative answers to the most crucial questions business technical and architectural decision makers ask about SOA. It draws on the immense experience of two SOA experts who have participated in more than 100 SOA projects in the roles of architect, designer, consultant, technical manager, and strategist. Organized to reflect the Open Group's Open Services Integration Maturity Model (OSIMM), this book provides fast, convenient access to information about all facets of SOA planning, implementation, management, and utilization. This book will be an invaluable resource for all executives, architects, and practitioners who have just started their SOA journey or are well underway. In-depth answers to questions about SOA topics such as SOA Concepts and Planning, Business Strategy, Organization and Support, Governance, Methods and Techniques, Applications, Architecture, Information Management, Infrastructure, The Future of SOA. 100 SOA Questions answers the most critical questions executives and practitioners have about SOA. Kerrie Holley and Dr. Ali Arsanjani draw on their unsurpassed experience from hundreds of SOA projects conducted worldwide. Why should business stakeholders care about SOA? What is the return on investment (ROI) of SOA adoption? What is flexibility, and how does SOA deliver on this promise? Should service development be centralized in service centers? How should services be identified or specified to maximize reuse? How do SOA methods reduce the lifetime costs for applications? How can organizational barriers to SOA success be removed? What changes with application development when SOA is introduced? How does architecture change as a result of SOA adoption? What is a canonical message model? How does the SOA infrastructure support events? What are context-aware services? *100 SOA Questions* Kerrie Holley, Ali Arsanjani, 2011

Perspectives in Business Informatics Research Václav Řepa, Tomáš Bruckner, 2016-09-07 This book constitutes the proceedings of the 15th International Conference on Perspectives in Business Informatics Research (BIR 2016) held in Prague, Czech Republic, in September 2016. Overall, 61 submissions from 16 countries were rigorously reviewed by 42 members of the program committee representing 21 countries. The selected 21 full papers and 3 short papers are included in this volume, together with 2 abstracts of invited talks. This year, again, the papers presented at the conference cover many important aspects of the development, use, and application of management information systems. The papers have been organized in topical sections on Business Processes and Enterprise Modeling, Information Systems Development, Information Systems Management, Learning and Capability, and Data Analysis.

DSS 2.0 - Supporting Decision Making With New Technologies Sven Carlsson, Patrick Brezillon, 2014-05-15 Advances in technology have resulted in new and advanced methods to support decision making. For example, artificial intelligence has enabled people to make better decisions through the use of Intelligent Decision Support Systems (DSS). Emerging research in DSS demonstrates that decision makers can operate in a more timely manner using real-time data more accurately due to data mining and big data methods more strategically by considering a greater number of factors more precisely and inclusively due to the availability of social

networking data and with a wider media reach with video and audio technology This book presents the proceedings of the IFIP TC8 Working Group 8.3 conference held at the Universit  Pierre et Marie Curie in Paris France in June 2014 Throughout its history the conference has aimed to present the latest innovations and achievements in Decision Support Systems This year the conference looks to the next generation with the theme of new technologies to enable DSS 2.0 The topics covered include theoretical empirical and design science research case based approaches in decision support systems decision models in the real world healthcare information technology decision making theory knowledge management knowledge and resource discovery business intelligence group decision support systems collaborative decision making analytics and big data rich language for decision support multimedia tools for DSS Web 2.0 systems in decision support context based technologies for decision making intelligent systems and technologies in decision support organizational decision support research methods in DSS 2.0 mobile DSS competing on analytics and social media analytics The book will be of interest to all those who develop or use Decision Support Systems The variety of methods and applications illustrated by this international group of carefully reviewed papers should provide ideas and directions for future researchers and practitioners alike

Brain Information Processing Daya Shankar Gupta,Hugo Merchant,2017-04-13 Optimized interaction of the brain with environment requires the four dimensional representation of space time in the neuronal circuits Information processing is an important part of this interaction which is critically dependent on time dimension Information processing has played an important role in the evolution of mammals and has reached a level of critical importance in the lives of primates particularly the humans The entanglement of time dimension with information processing in the brain is not clearly understood at present Time dimension in physical world the environment of an organism can be represented by the interval of a pendulum swing the cover page depicts temporal unit with the help of a swinging pendulum Temporal units in neural processes are represented by regular activities of pacemaker neurons tonic regular activities of proprioceptors and periodic fluctuations in the excitability of neurons underlying brain oscillations Moreover temporal units may be representationally associated with time bins containing bits of information see the Editorial which may be studied to understand the entanglement of time dimension with neural information processing The optimized interaction of the brain with environment requires the calibration of neural temporal units Neural temporal units are calibrated as a result of feedback processes occurring during the interaction of an organism with environment Understanding the role of time dimension in the brain information processing requires a multidisciplinary approach which would include psychophysics single cell studies and brain recordings Although this Special Issue has helped us move forward on some fronts including theoretical understanding of calibration of time information in neural circuits and the role of brain oscillations in timing functions and integration of asynchronous sensory information further advancements are needed by developing correct computational tools to resolve the relationship between dynamic hierarchical neural oscillatory structures that form during the brain s interaction with environment

Roland Pfister, **Is Conflict Adaptation an Illusion?** James R Schmidt, Wim Notebaert, Eva Van Den Bussche, 2015-05-20 Conflict adaptation theory is one of the most popular theories in cognitive psychology The theory argues that participants strategically modulate attention away from distracting stimulus features in response to conflict Although results with proportion congruent sequential congruency and similar paradigms seem consistent with the conflict adaptation view some researchers have expressed scepticism The paradigms used in the study of conflict adaptation require the manipulation of stimulus frequencies sequential dependencies time on task regularities and various other task regularities that introduce the potential for learning of conflict unrelated information This results in the unintentional confounding of measures of conflict adaptation with simpler learning and memory biases There are also alternative accounts which propose that attentional adaptation does occur but via different mechanisms such as valence expectancy or effort A significant and often heated debate remains surrounding the question of whether conflict adaptation exists independent of these alternative mechanisms of action The aim of this Research Topic is to provide a forum for current directions in this area considering perspectives from all sides of the debate Derivative Pricing Ambrose Lo, 2018-07-04 The proliferation of financial derivatives over the past decades options in particular has underscored the increasing importance of derivative pricing literacy among students researchers and practitioners Derivative Pricing A Problem Based Primer demystifies the essential derivative pricing theory by adopting a mathematically rigorous yet widely accessible pedagogical approach that will appeal to a wide variety of audience Abandoning the traditional black box approach or theorists pedantic approach this textbook provides readers with a

solid understanding of the fundamental mechanism of derivative pricing methodologies and their underlying theory through a diversity of illustrative examples The abundance of exercises and problems makes the book well suited as a text for advanced undergraduates beginning graduates as well as a reference for professionals and researchers who need a thorough understanding of not only how but also why derivative pricing works It is especially ideal for students who need to prepare for the derivatives portion of the Society of Actuaries Investment and Financial Markets Exam Features Lucid explanations of the theory and assumptions behind various derivative pricing models Emphasis on intuitions mnemonics as well as common fallacies Interspersed with illustrative examples and end of chapter problems that aid a deep understanding of concepts in derivative pricing Mathematical derivations while not eschewed are made maximally accessible A solutions manual is available for qualified instructors The Author Ambrose Lo is currently Assistant Professor of Actuarial Science at the Department of Statistics and Actuarial Science at the University of Iowa He received his Ph D in Actuarial Science from the University of Hong Kong in 2014 with dependence structures risk measures and optimal reinsurance being his research interests He is a Fellow of the Society of Actuaries FSA and a Chartered Enterprise Risk Analyst CERA His research papers have been published in top tier actuarial journals such as ASTIN Bulletin The Journal of the International Actuarial Association Insurance Mathematics and Economics and Scandinavian Actuarial Journal
