Biodesign in high schools Giovanna Danies Turano, María Paula Barón Aristizábal, Andrea Peralta Mejía, Andrea Forero Cañizares, Jenny Grillo Naranjo, 2023-07-18 Traditional education which is mainly based on evaluating theoretical content at the end of a course is not in keeping with the skillset we require in the twenty first century Today we need creative and innovative individuals who can think critically who are capable of learning to learn and who have complex problem solving skills We need people who can work collaboratively using transdisciplinary communication skills We need citizens who are aware of local needs but have a global vision They must make decisions not only based on their own well being but also in the best interests of the community and the planet They must understand that the solution requires a balance People can acquire these skills through design thinking which builds the learning process by carrying out projects and theorizes based on set challenges Biodesign for High Schools is a pedagogical proposal that combines scientific topics with a creative approach it offers a plethora of possibilities to prepare future high school graduates to respond to the needs of today s world **ECRM**
