The text will guide students to learn how to identify and define the behavior to be changed and how a response is determined by its antecedents and consequences, usable practical skills by specifically stating the purpose of each technique, describing how it is carried out, and presenting guidelines and tips to maximize its effectiveness. Why and how to design a program to change a behavioral deficit or excess by conducting a functional assessment and then selecting and combining techniques that can be directed at the behavior itself and its antecedents and consequences, and to illustrate why and how to collect and analyze data.
