

charging the battery

Because the battery is the "heart" of your car's electrical system, periodic checks are necessary to keep it functioning properly.

Keep the battery fluid level up to the ring under the filler cap. Ordinary tap water may be used except in areas where the water is known to be exceptionally hard or to have a high mineral or alkali content. In these areas, distilled water must be used. If water is added during freezing weather, drive the car five or six miles before shutting it off. This mixes the added water with the electrolyte and will prevent it from freezing and damaging the battery.

Have the battery charge checked regularly during extremely cold weather to make sure it has enough power to do its job. Make sure the cables are clean and tightly clamped to the battery terminals.

Corrosion can be removed from the cables and terminals with a solution of baking soda

or ammonia and water. After cleaning, flush the top of the battery with clean water, and coat the parts with grease to retard further corrosion.

headlight and lamp replacement

To replace a headlight, remove the headlight trim cover retaining screws and remove the cover. Then loosen, but don't remove, the three retaining ring screws shown in the illustration. Rotate the headlight retaining ring counterclockwise and pull it forward so that the headlight can be unplugged and removed. Plug in the new headlight and install it and its retaining ring in position. Rotate the retaining ring clockwise on the three screws and tighten the screws. Then install the trim ring.

New replacement lamps are available from your Ford dealer. The lamp specifications for all the lights in your Mustang are listed on Page 65.
