The goal is to understand how the brain and the mind are related. This is a very exciting and rapidly growing field of research. It is the intersection of psychology, neuroscience, and cognitive science. The field is still in its early stages, but it has the potential to revolutionize our understanding of the human mind.

(2000), who reported that the use of the Internet in the workplace is positively related to the use of the telephone in the workplace. This is in contrast to the findings of the present study, which found that the use of the Internet in the workplace is negatively related to the use of the telephone in the workplace.
