Advances in Wireless Sensor Networks Limin Sun, Huadong Ma, Dingyi Fang, Jinping Niu, Wei Wang, 2015-05-15 This book constitutes the refereed proceedings of the 8th China Conference of Wireless Sensor Networks held in Xi'an, China, in October-November 2014. The 64 revised full papers were carefully reviewed and selected from 365 submissions. The papers are organized in topical sections on power control and management, network architecture and deployment, positioning and location based services in wireless sensor networks, security and privacy, wireless communication systems and protocols, routing algorithm and transport protocols in wireless sensor networks, wireless communication protocols and sensor data quality, integrity and trustworthiness, Internet of Things, wireless mobile network architecture in vehicle network, indoor positioning and location based services, applications of wireless sensor networks.

Real-World Wireless Sensor Networks Koen Langendoen, Wen Hu, Federico Ferrari, Marco Zimmerling, Luca Mottola, 2013-12-19 This edited book presents the results of the 5th Workshop on Real World Wireless Sensor Networks (REALWSN). The purpose of this workshop was to bring together researchers and practitioners working in the area of sensor networks with focus on real world experiments or deployments of wireless sensor networks. Included were nonetheless emerging forms of sensing such as those that leverage smart phones, Internet of Things (RFIDs) and robots. Indeed, when working with real world experiments or deployments, many new or unforeseen issues may arise. The network environment may be composed of a variety of different technologies leading to very heterogeneous network structures. Software development for large scale networks poses new types of problems. The performance of prototype networks may differ significantly from the deployed system, whereas actual sensor network deployments may need a complex combination of autonomous and manual configuration. Furthermore, results obtained through simulation are typically not directly applicable to operational networks. It is therefore imperative for the community to produce results from experimental research. The workshop collected the state of the art in emerging and current research trends dealing with Real World Wireless Sensor Networks with the aim of representing a stepping stone for future research in this field.

Wireless Technologies Krzysztof Iniewski, 2017-12-19 Advanced concepts for wireless technologies present a vision of technology that is embedded in our surroundings and practically invisible.
