The Writing Revolution 2.0 Judith C. Hochman, Natalie Wexler, 2025-04-01 Lead a writing revolution in your classroom with the proven Hochman Method. Building on the success of the original best seller, this new edition of *The Writing Revolution* adds valuable guidance for teachers seeking a way to bring their students' writing ability up to rigorous state standards. As thousands of educators have already discovered, *The Writing Revolution* provides the road map they need, clearly explaining how to incorporate the Hochman Method into their instruction, no matter what subject or grade they're teaching and regardless of the ability level of their students. The new edition provides a reorganized sequence of activities and even more student-facing examples, making it easier than ever to bring the method to your classroom. *The Writing Revolution* isn't a separate curriculum or program teachers need to juggle. Rather, it is a method providing strategies and activities that teachers can adapt to their preexisting curriculum and weave into their content instruction. By focusing on specific techniques that match their students' needs and providing them with targeted feedback, *The Writing Revolution* can turn weak writers into strong and confident communicators. In addition, the method can identify misconceptions and gaps in knowledge, boost reading comprehension and learning, improve organizational skills, enrich oral language, develop analytical abilities. *The Writing Revolution* takes the mystery out of teaching students to write well.

Student Writing Theresa M. Lillis, 2002-01-04 *Student Writing* presents an accessible and thought-provoking study of academic writing practices informed by composition research from the US and academic literacies studies from the UK. The book challenges current official discourse on writing as a skill. Lillis argues for an approach which sees student writing as social practice. The book draws extensively on a three-year study with ten non-traditional students in higher education and their experience of academic writing. Using case study material, including literacy history interviews, extended discussions with students about their writing of discipline-specific essays, and extracts from essays, Lillis identifies the following as three significant dimensions to academic writing: Access to higher education and to its language and literacy representational resources; Regulation of meaning-making in academic writing; Desire for participation in higher education and for choices over ways of meaning in academic writing. *Student Writing* access, regulation, desire raises questions about why academics write as they do, who benefits from such writing, which meanings are valued, and how, on what terms outsiders get to be insiders and at what costs.
