Computational Logistics Carlos Paternina-Arboleda, Stefan Voß, 2019-09-20 This book constitutes the proceedings of the 10th International Conference on Computational Logistics ICCL 2019 held in Barranquilla Colombia in September October 2019 The 27 papers included in this book were carefully reviewed and selected from 49 submissions They were organized in topical sections named freight transportation and urban logistics maritime and port logistics vehicle routing problems network design and distribution problems and selected topics in decision support systems and ICT tools **Green Logistics** Alan McKinnon, Michael Browne, Anthony Whiteing, Maja Piecyk, 2015-02-03 Leading the way in current thinking on environmental logistics Green Logistics provides a unique insight on the environmental impacts of logistics and the actions that companies and governments can take to deal with them It is written by leading researchers in the field and provides a comprehensive view of the subject for students managers and policy makers Fully updated the 3rd edition of Green Logistics has a more global perspective than previous editions It introduces new contributors and international case studies that illustrate the impact of green logistics in practice There is a new chapter on the links between green logistics and corporate social responsibility and a series of postscripts examining the effects of new developments such as 3D printing distribution by drone the physical internet and the concept of peak freight Other key topics examined include carbon auditing of supply chains transferring freight to greener transport modes reducing the environmental impact of warehousing improving the energy efficiency of freight transport making city logistics more environmentally sustainable reverse logistics for the management of waste role of government in promoting sustainable logistics The 3rd edition of Green Logistics includes indispensable online supporting materials including graphics tables chapter summaries and guidelines for lecturers

Electric and Hybrid Vehicles Tom Denton, 2020-06-29 Electric and hybrid vehicles are now the present not the future This straightforward and highly illustrated full colour textbook is endorsed by the Institute of the Motor Industry and introduces the subject for further education and undergraduate students as well as technicians This new edition includes a new section on diagnostics and completely updated case studies It covers the different types of electric vehicle costs and emissions and the charging infrastructure before moving on to explain how hybrid and electric vehicles work A chapter on electrical technology introduces learners to subjects such as batteries control systems and charging which are then covered in more detail within their own chapters The book also covers the maintenance and repair procedures of these vehicles including fault finding servicing repair and first responder information Clear diagrams photos and flow charts outline the charging infrastructure how EV technology works and how to repair and maintain hybrid and electric vehicles Optional IMI online eLearning materials enable students to study the subject further and test their knowledge It is particularly suitable for students studying towards IMI Level 2 Award in Hybrid Electric Vehicle Operation and Maintenance IMI Level 3 Award in Hybrid Electric Vehicle Repair and Replacement IMI Accreditation C G and other EV Hybrid courses **Urban Freight**

Transportation Systems Ralf Elbert, Christian Friedrich, Manfred Boltze, Hans-Christian Pfohl, 2019-09-28 Urban Freight Transportation Systems offers new insights into the complexities of today's urban freight transport system. It provides a much needed multidisciplinary perspective from researchers in not only transportation but also engineering, business management, planning and the law. The book examines numerous critical issues such as strategies for delivery logistics and freight transport, spatial patterns, urban policy assessment, innovative transportation technologies, urban hubs and the role factories play in the urban freight transport system. The book offers a novel conceptual approach for addressing the problems of production logistics and traffic in an urban context. As most of the world's population now live in cities, thus significantly increasing commercial traffic, there are numerous challenges for efficiently and sustainably delivering goods into cities. This book provides solutions and tactics to those challenges. Includes interdisciplinary contributors from around the globe. Provides never before published original research to help users stay current and develop a deeper understanding of the field. Presents the methods and results of research that is useful for both academics and practitioners. The Handbook of Lithium-Ion Battery Pack Design John T. Warner, 2015-05-23 The Handbook of Lithium Ion Battery Pack Design: Chemistry, Components, Types and Terminology offers to the reader a clear and concise explanation of how Li-ion batteries are designed from the perspective of a manager, sales person, product manager or entry level engineer who is not already an expert in Li-ion battery design. It will offer a layman's explanation of the history of vehicle electrification, what the various terminology means and how to do some simple calculations that can be used in determining basic battery sizing, capacity, voltage and energy. By the end of this book, the reader has a solid understanding of all of the terminology around Li-ion batteries and is able to do some simple battery calculations. The book is immensely useful to beginning and experienced engineers alike who are moving into the battery field. Li-ion batteries are one of the most unique systems in automobiles today in that they combine multiple engineering disciplines yet most engineering programs focus on only a single engineering field. This book provides you with a reference to the history, terminology and design criteria needed to understand the Li-ion battery and to successfully lay out a new battery concept. Whether you are an electrical engineer, a mechanical engineer or a chemist, this book helps you better appreciate the interrelationships between the various battery engineering fields that are required to understand the battery as an Energy Storage System. Offers an easy explanation of battery terminology and enables better understanding of batteries, their components and the market place. Demonstrates simple battery scaling calculations in an easy to understand description of the formulas. Describes clearly the various components of a Li-ion battery and their importance. Explains the differences between various Li-ion cell types and chemistries and enables the determination which chemistry and cell type is appropriate for which application. Outlines the differences between battery types, e.g. power vs. energy battery. Presents graphically different vehicle configurations: BEV, PHEV, HEV. Includes brief history of vehicle electrification and its future. *Directions of Development of Transport Networks and Traffic Engineering* Elżbieta

Macioszek, Grzegorz Sierpiński, 2018-07-30 This book offers a collection of valuable guidelines for making decisions concerning the future development of transport networks and traffic engineering The decision making support systems described here will certainly attract the interest of those who face the challenge of finding solutions to problems concerning modern transport systems on a daily basis Consequently the book is chiefly intended for local authorities involved in planning and preparing development strategies for specific transport related areas in both urban and regional contexts as well as for representatives of business and industry who are directly engaged in the implementation of traffic engineering solutions The guidelines provided in the respective chapters help to address the given problem soundly and to simplify the selection of an appropriate strategy The topics covered include increasing the competitiveness of public transport the status quo of electric vehicle infrastructures worldwide methods for calming urban traffic as an element of sustainable transport development speed traffic zones and electric buses car sharing systems in Poland a method for deconstructing the regional travel demand model monitoring urban traffic using floating car data problems of deliveries in urban agglomeration distribution systems estimating the number of threatened people in case of fire in road tunnels and road pavement evaluation using advanced tools Since the book also considers new approaches to theoretical models including traffic flow surveys and measurements transport behaviors human factors in traffic engineering and road condition modeling it will also appeal to researchers and scientists studying these problems The book gathers selected papers presented at the 15th Scientific and Technical Conference Transport Systems Theory and Practice organized by the Department of Transport Systems and Traffic Engineering Silesian University of Technology in Katowice Poland on September 17 19 2018 **Applied Computer Sciences in Engineering** Juan Carlos Figueroa-García, Fabián Steven Garay-Rairán, Germán Jairo Hernández-Pérez, Yesid Díaz-Gutierrez, 2020-10-07 This volume constitutes the refereed proceedings of the 7th Workshop on Engineering Applications WEA 2020 held in Bogota Colombia in October 2020 The 32 revised full papers and 12 short papers presented in this volume were carefully reviewed and selected from 136 submissions The papers are organized in the following topical sections computational intelligence computer science optimization bioengineering military applications simulation IoT and networks power applications **The Automotive Industries of Asia-Pacific** Tony Pugliese, 2000 **Autocar** , 2005 Motor Business Asia-Pacific , 2000 Electric Vehicle Progress , 2002 *Parliamentary Debates (Hansard)*.
