**Machining and Tribology of Advanced Materials** Nishant Kumar Singh, Rajesh Kumar Verma, Virendra Kumar, J. Paulo Davim, 2025-03-17 The work provides a comprehensive examination of techniques and challenges that underpin the effective processing and long term utilisation of advanced materials Covering the broad range of topics from laser and electrical discharge machining tribological behaviour of materials like friction or wear mechanisms in composites it presents as well case studies in the aerospace and automotive industries and bioengineering applications Product Lifecycle Management and the Industry of the Future José Ríos, Alain Bernard, Abdelaziz Bouras, Sebti Foufou, 2017-12-19 This book constitutes the refereed post conference proceedings of the 14th IFIP WG 5.1 International Conference on Product Lifecycle Management PLM 2017 held in Seville Spain in July 2017 The 64 revised full papers presented were carefully reviewed and selected from 78 submissions The papers are organized in the following topical sections PLM maturity implementation and adoption PLM for digital factories PLM and process simulation PLM CAX and knowledge management PLM and education BIM cyber physical systems modular design and products new product development ontologies knowledge and data models and Product Service Systems PSS  
*Terminological Dictionary of Automatic Control, Systems and Robotics* Rihard Karba, Juš Kocijan, Tadej Bajd, Mojca Žagar Karer, Gorazd Karer, 2024-01-02 This dictionary contains terms from the fields of automatic control which includes mathematical modelling simulation of dynamic systems automation technology with its corresponding elements and robotics It also includes signal processing information technologies and production technologies The terminological dictionary is primarily aimed at experts and students who deal with control technology and dynamic systems in both technical and non technical domains To be able to use the dictionary at least basic knowledge in this field is required In the dictionary users will find concise terminological definitions A concept may be designated by different terms therefore cross references are used The aim of the dictionary is to collect and unify at least to an achievable extent the terminology in the field of automatic control dynamic systems and robotics  
*Dynamics of Long-Life Assets* Stefan N. Grösser, Arcadio Reyes-Lecuona, Göran Granholm, 2017-05-10 This book is published under a CC BY NC 4.0 license The editors present essential methods and tools to support a holistic approach to the challenge of system upgrades and innovation in the context

of high value products and services The approach presented here is based on three main pillars an adaptation mechanism based on a broad understanding of system dependencies efficient use of system knowledge through involvement of actors throughout the process and technological solutions to enable efficient actor communication and information handling The book provides readers with a better understanding of the factors that influence decisions and put forward solutions to facilitate the rapid adaptation to changes in the business environment and customer needs through intelligent upgrade interventions Further it examines a number of sample cases from various contexts including car manufacturing utilities shipping and the furniture industry The book offers a valuable resource for both academics and practitioners interested in the upgrading of capital intensive products and services The work performed in the project Use It Wisely UiW significantly contributes towards a collaborative way of working Moreover it offers comprehensive system modelling to identify business opportunities and develop technical solutions within industrial value networks The developed UiW framework fills a void and offers a great opportunity The naval construction sector of small passenger vessels for instance is one industry that can benefit Nikitas Nikitakos Professor at University of the Aegean Department of Shipping Trade and Transport Greece Long life assets are crucial for both the future competitiveness and sustainability of society Make wrong choices now and you are locked into a wrong system for a long time Make the right choices now and society can prosper This book gives important information about how manufacturers can make right choices Arnold Tukker Scientific director Institute of Environmental Sciences CML Leiden University and senior scientist TNO *Machine Tools* Wasim Ahmed Khan,Khalid Rahman,Ghulam Hussain,Ghulam Abbas,Xiaoping Wang,2023-02-02 This book introduces the applications of Industry 4 0 in machine tools through an overview of the latest available digital technologies It focuses on digital twining communication between industrial controls motion and input output devices along with sustainability in SMEs Machine Tools An Industry 4 0 Perspective focuses on the digital twining of machine tools which improves the life of the machines and provides a method of operating a factory during times of complete lockdown resulting from various conditions It presents an overview of the communication between industrial controls motion and input output devices through standardized digital interfaces such as SERCOS and USB The book goes on to discuss industrial cybersecurity systems applicable to discrete manufacturing which includes cyberattacks and human errors and address the security aspects related to software hardware and data The book also explores the application of big data for different stages of production and illustrates the uses such as predictive maintenance product quality product life cycle management PLM and more This book is an ideal reference for undergraduate graduate and postgraduate students of industrial mechanical and mechatronics engineering along with professionals and general readers **Sheet Metal 2005** Manfred Geiger,Joost R.
