This book is written by a philosopher for other philosophers and for that section of the reading public who buy in large quantities and no doubt devour with great earnestness the popular books written by scientists for their enlightenment We common readers to adapt a phrase from Samuel Johnson are fitted neither to criticize physical theories not to decide what precisely are their implications We are dependent upon the scientists for an exposition of those developments which so we find them proclaiming have important and far reaching consequences for philosophy Unfortunately however our popular expositors do not always serve us very well The two who are most widely read in this country are Sir Arthur Eddington and Sir James Jeans They are not always reliable guides Their influence has been considerable upon the reading public upon theologians and upon preachers they have even misled philosopher who should have known better Accordingly it has seemed to me to be worth while to examine in some detail the philosophical views that they have put forth and to criticize the grounds upon which these views are based *Holt Science and Technology* Holt Rinehart & Winston,2004-02 **Holt Science and Technology 2002** Holt Rinehart & Winston,Holt, Rinehart and Winston Staff,2002 The Working Press of the Nation ,1978 Mathematical Tables of Elementary and Some Higher Mathematical Functions Herbert Bristol Dwight,1958 A Course in Mathematical Analysis: Derivatives and differentials.
