Cascades of Violence John Braithwaite, Bina D'Costa, 2018-02-01 As in the cascading of water violence and nonviolence can cascade down from commanding heights of power as in waterfalls up from powerless peripheries and can undulate to spread horizontally flowing from one space to another As with containing water conflict cannot be contained without asking crucial questions about which variables might cause it to cascade from the top down bottom up and from the middle out The book shows how violence cascades from state to state Empirical research has shown that nations with a neighbor at war are more likely to have a civil war themselves Sambanis 2001 More importantly in the analysis of this book war cascades from hot spot to hot spot within and between states Autesserre 2010 2014 The key to understanding cascades of hot spots is in the interaction between local and macro cleavages and alliances Kalyvas 2006 The analysis exposes the folly of asking single level policy questions like do the benefits and costs of a regime change in Iraq justify an invasion We must also ask what other violence might cascade from an invasion of Iraq The cascades concept is widespread in the physical and biological sciences with cascades in geology particle physics and the globalization of contagion The past two decades has seen prominent and powerful applications of the cascades idea to the social sciences Sunstein 1997 Gladwell 2000 Sikkink 2011 In his discussion of ethnic violence James Rosenau 1990 stressed that the image of turbulence developed by mathematicians and physicists could provide an important basis for understanding the idea of bifurcation and related ideas of complexity chaos and turbulence in complex systems He classified the bifurcated systems in contemporary world politics as the multicentric system and the statecentric system Each of these affects the others in

multiple ways at multiple levels and in ways that make events enormously hard to predict Rosenau 1990 2006 He replaced the idea of events with cascades to describe the event structures that gather momentum stall reverse course and resume anew as their repercussions spread among whole systems and subsystems 1990 299 Through a detailed analysis of case studies in South Asia that built on John Braithwaite's twenty five year project Peacebuilding Compared and coding of conflicts in different parts of the globe we expand Rosenau's concept of global turbulence and images of cascades In the cascades of violence in South Asia we demonstrate how micro events such as localized riots land grabbing pervasive militarization and attempts to assassinate political leaders are linked to large scale macro events of global politics We argue in order to prevent future conflicts there is a need to understand the relationships between history structures and agency interest values and politics global and local factors and alliances

Cyber-Security in Critical Infrastructures Stefan Rass, Stefan Schauer, Sandra König, Quanyan Zhu, 2020-06-24 This book presents a compendium of selected game and decision theoretic models to achieve and assess the security of critical infrastructures Given contemporary reports on security incidents of various kinds we can see a paradigm shift to attacks of an increasingly heterogeneous nature combining different techniques into what we know as an advanced persistent threat Security precautions must match these diverse threat patterns in an equally diverse manner in response this book provides a wealth of techniques for protection and mitigation Much traditional security research has a narrow focus on specific attack scenarios or applications and strives to make an attack practically impossible A more recent approach to security views it as a scenario in which the cost of an attack exceeds the potential reward This does not rule out the possibility of an attack but minimizes its likelihood to the least possible risk The book follows this economic definition of security offering a management scientific view that seeks a balance between security investments and their resulting benefits It focuses on optimization of resources in light of threats such as terrorism and advanced persistent threats Drawing on the authors experience and inspired by real case studies the book provides a systematic approach to critical infrastructure security and resilience Presenting a mixture of theoretical work and practical success stories the book is chiefly intended for students and practitioners seeking an introduction to game and decision theoretic techniques for security The required mathematical concepts are self contained rigorously introduced and illustrated by case studies The book also provides software tools that help guide readers in the practical use of the scientific models and computational frameworks

Deterrence, Choice, and Crime, Volume 23 Daniel S. Nagin, Francis T. Cullen, Cheryl Lero Jonson, 2018-04-17 Deterrence Choice and Crime explores the various dimensions of modern deterrence theory relevant research and practical applications Beginning with the classical roots of deterrence theory in Cesare Beccaria's profoundly important contributions

to modern criminological thought the book draws out the many threads in contemporary criminology that are explicitly mentioned or at least hinted by Beccaria These include sanction risk perceptions and their behavioral consequences the deterrent efficacy of the certainty versus the severity of punishment the role of celerity of punishment in the deterrence process informal versus formal deterrence and individual differences in deterrence The richness of the volume is seen in the inclusion of chapters that focus on the theoretical development of deterrence across disciplines such as criminology and economics In an innovative section the role of agents of deterrence is considered Lessons are learned from the practical applications of deterrence undertaken in the areas of policing corrections and the community The closing section includes Michael Tonry's An Honest Politician's Guide to Deterrence Certainty Severity Celerity and Parsimony a reminder of Beccaria's dictum that it is better to prevent crimes than punish them In the current environment deterrence arguments are routinely used to justify policies that do just the opposite Ray Paternoster who contributed two chapters passed away as this volume was being finalized Fittingly this book is dedicated to him and ends with Alex Piquero's poignant remembrance of Ray a path breaking deterrence scholar beloved mentor and ardent supporter of social justice Suitable for researchers and graduate students as well as for advanced courses in criminology this book breaks new ground in theorizing the effects of punishment and other sanctions on crime control

Hidden Wars Sara E. Davies, Jacqui True, 2024 Sexual and gender based violence SGBV has always been a part of warfare In Asia testimonies of egregious rape and sexual violence extend back to the Rape of Nanjing to the experience of the Korean comfort women in World War II and to forced marriages and sexual slavery during the Cambodian genocide The past two decades have yielded crucial new insights about SGBV but scholars and researchers still struggle to explain why and when this violence occurs A major problem is that incidences of SGBV are vastly underreported reliable data is especially scarce in Asia where demographic and health surveys are infrequent and national reporting systems are underdeveloped relative to other parts of the globe Asia also has some of the most protracted conflicts in the world but the complexity of subnational conflicts in Asia often masks the gendered dimensions of violence In *Hidden Wars* Sara E Davies and Jacqui True examine the relationship between reports of SGBV and structural gender inequality in three conflict affected societies in Asia Burma the Philippines and Sri Lanka Based on

extensive field research and an original dataset on conflict related SGBV Davies and True show how reporting is significantly constrained by a variety of factors including normalized gendered violence as well as political dynamics affecting local civil society humanitarian and international organizations They address the real world limitations of data collection and argue that these constraints reinforce a culture of silence and impunity that perpetuates SGBV and permits governments to abrogate their responsibility for this violence Hidden Wars breaks new methodological ground in showing that what we know about SGBV can be understood fully only if the politicized context of reporting SGBV and data collection is taken into consideration

East Asia's Other Miracle Alex J. Bellamy, 2017-09-29 East Asia until recently the scene of widespread blood letting has achieved relative peace A region that at the height of the Cold War had accounted for around eighty percent of the world's mass atrocities has experienced such a decline in violence that by 2015 it accounted for less than five percent This book explains East Asia's other miracle and asks whether it is merely a temporary blip in the historical cycle or the dawning of a new and more peaceful era for the region It argues that the decline of mass atrocities in East Asia resulted from four interconnected factors the consolidation of states and emergence of responsible sovereigns the prioritization of economic development through trade the development of norms and habits of multilateralism and transformations in the practice of power politics Particular attention is paid to North Korea and Myanmar countries whose experience has bucked regional trends largely because these states have not succeeded in consolidating themselves to the point where they no longer depend on violence to survive Although the region faces several significant future challenges this book argues that the much reduced incidence of mass atrocities in East Asia is likely to be sustained into the foreseeable future
