Communications Technology has revolutionised the ways we process access and use information and as computers and other devices become ever more powerful and information becomes more readily available the next generation will need to be able to interact with digital media effectively to exploit these amazing new technologies to their full potential for the benefit of society. It is therefore imperative that teachers become familiar with ICT and its true potential and can present information with a perspective similar to that which the present generation of young people is using to develop their interests in their everyday life. This resource from the RSC gives teachers of chemistry the practical help needed to integrate ICT into their teaching and stimulate the enthusiasm of a new generation of scientists in the exciting new areas of chemistry that are opening up such as Nanoscience and Nanotechnology. Furthermore it will be highly effective in developing the new ethos of sustainability that will be a major driving force behind the next advances in chemistry that are vital if we are to survive the manifold problems confronting society in the next few decades. This resource is ideal for all secondary teachers of chemistry, trainee teachers and university lecturers.

[Reactions in Aqueous Solution](#) The Open The Open Courses Library, 2019-12-02. Reactions in Aqueous Solution Grade 10 Physical Science. Many reactions in chemistry and all biological reactions in living systems take place in water. We say that these reactions take place in aqueous solution. Water has many unique properties and is plentiful on Earth. For these reasons reactions in aqueous solutions occur frequently. In this book we look at some of these reactions in detail. Almost all the reactions that occur in aqueous solutions involve ions. We look at three main types of reactions that occur in aqueous solutions, namely precipitation reactions, acid-base reactions and redox reactions. Before we can learn about the types of reactions we need to first look at ions in aqueous solutions and electrical conductivity. Chapter Outline: Introduction and concepts, Types of reactions. The Open Courses Library introduces you to the best Open Source Courses.
