Microchakras Sri Shyamji Bhatnagar, David Isaacs, 2009-07-13 The first guide to working with microchakras the channels within each of the 7 major chakras Identifies 147 microchakras that affect our spiritual evolution and daily well being

Introduces the new field of Microchakra Psychology and its practical component of InnerTuning the use of precise sacred sounds that release energy blockages within the chakras Each of the traditional 7 chakras contains 21 microchakras which enable the chakras to process information related to our thoughts feelings and behavior When the energy flowing in the chakras is blocked our physical emotional and psychological well being is compromised Through the unique practice of InnerTuning a system of precise potent sounds and mantras blockages in the microchakras can be released so the subtle body can become realigned and physical and mental health can be restored Sri Shyamji Bhatnagar developed the InnerTuning technique from his early work with breath and sacred sounds which began at age 12 with his guru in India In 1967 his discovery of the 147 microchakras inspired his creation of Microchakra Psychology a blend of ancient wisdom and contemporary psychology that explains the workings of the subtle body and how openings or blockages in the chakras can either encourage or sabotage psychological health and spiritual development In this book Shyamji describes methods for optimizing energy flow in the microchakras using the practice of InnerTuning in order to enhance one s well being and promote spiritual growth through the power of sound breath and the divine energy that resides within us all *Animal Emotions* Kenneth L Davis,Christian Montag,2020-06-16 *Animal Emotions How They Drive Human Behavior* gives a concise overview of ancient mammalian emotions deeply rooted in the human brain Jaak Panksepp a world renowned neuroscientist dedicated his life career to the study of mammalian emotions and he carved out seven distinct emotional systems he called seeking lust care and play positive emotions and fear anger and sadness negative emotions all exerting a tremendous influence on human behavior Christian Montag a neuroscientist and psychologist and a long time collaborator of Jaak Panksepp revisits together with Kenneth L Davis one of Jaak s PhD students Panksepp s theories and provides the reader with new insights into the nature of emotions and their role as survival tools both for animals and for humans They also raise new questions about the background of the research field Jaak Panksepp coined Affective Neuroscience How are personality and psychopathology linked to animal emotions Do animals feel the same way as we do What are our emotional needs in a digital society and what is key to a happy life *The Emotional Foundations of Personality* Kenneth L. Davis,Jaak Panksepp,2018-03-27 A CHOICE Magazine Outstanding Academic Title of 2018 A novel approach to understanding personality based on evidence that we share more than we realize with other mammals This book presents the wealth of scientific evidence that our personality emerges from evolved primary emotions shared by all mammals Yes your dog feels love and many other things too These subcortically generated emotions bias our actions alter our perceptions guide our learning provide the basis for our thoughts and memories and become regulated over the course of our lives Understanding personality development from the perspective of mammals is a groundbreaking approach and one that sheds new light on the ways in which we as humans respond to life events both good and bad Jaak Panksepp famous for discovering laughter in rats and for creating the field of affective neuroscience died in April 2017 This book forms part of his lasting legacy and impact on

a wide range of scientific and humanistic disciplines It will be essential reading for anyone trying to understand how we act in the world and the world's impact on us *The Handy Psychology Answer Book* Lisa J. Cohen, 2016-02-22 Bridges the gap between today's entertainment focused pop psychology on television and the dry academic research that is published in journals A primer on human behavior and psychology The Handy Psychology Answer Book helps answer why humans do what we do through accurate scientific data presented in a lively accessible and engaging way It covers the fundamentals and explains the psychology behind how people deal with money sex morality family children aging addiction work and other everyday issues It takes a journey through the history and science of psychology and showing how psychology affects us all Fully revised to reflect the latest scientific research such as the current DSM 5 Diagnostic and Statistical Manual of Mental Disorders published by the American Psychiatric Association the latest neurobiological theories and the changing face of marriage this timely reference has expanded to include information sections on the biology and evolution of emotions technology and adolescence bisexuality optimism autism as well as a full section on the law eyewitness testimony and police shootings Featuring more than 1 500 answers to questions concerning how the human mind and the science of psychology really work this fascinating guide delivers the real facts of modern psychology along with fun factoids and thought provoking insights into what motivates human behavior This intriguing exploration provides insights into the current science of the mind by answering questions such as How have other cultures addressed psychological issues Why was Freud so focused on sex How do twin studies help illuminate the role of genetics How can I maintain a healthy brain Why do some people hear voices that aren't really there Why do children see monsters in the closet at night How have recent changes in technology affected adolescent development Why does time seem to speed up as we age Is it normal to argue during marriage Does religion make people happier How do we reduce social prejudice How has morality changed over the course of history What are the personality traits of people who succeed in their professions Why do so many politicians get trapped in scandals Does genetics play a role in voting behavior Which therapies are best for which kinds of problems How might the stress of police work affect decision making in high stress situations The Handy Psychology Answer Book also includes a helpful glossary of terms complete reference sources for topics discussed and an index With a wide range of information suitable for everyone this is the ideal source for anyone looking to get a better understanding of psychology It provides clear answers on the history basic science and latest research and psychology behind everyday situations and at different stages in life **The Group Dimension** Claire Bacha, 2024-07-24 The Group Dimension presents a thorough exploration of the history and theory of the group dimension particularly in the context of modern capitalist society The book traces the development of capitalism from feudalism where the first polis groups can be identified and describes the growth of the power of the state prescribed by John Maynard Keynes to form neoliberalism Bacha then explores the deep history of human groups examines how our brains are built for and by multibody interactions and understandings and provides an overview of our knowledge of groups

building on findings from group analysis The book concludes by exploring how an understanding of groups their facilitation and their consciousness redefines current individualistic and autistic freedom to build the new world through dialogue The Group Dimension will be essential reading for anyone involved in groups as practitioners or clients It will also be of interest to readers looking to learn more about groups in the context of modern politics social and liberation movements *The Atlas of Social Complexity* Brian Castellani,Lasse Gerrits,2024-06-05 Embark on a riveting journey through the study of social complexity with The Atlas of Social Complexity Over three decades of scientific exploration unfold unravelling the enigmatic threads that compose the fabric of society From the dance of bacteria to human machine interactions to the ever shifting dynamics of power in social networks this Atlas maps the evolution of our understanding of social complexity **The Archaeology of Mind** Jaak Panksepp,Lucy Biven,2012-09-17 What makes us happy What makes us sad How do we come to feel a sense of enthusiasm What fills us with lust anger fear or tenderness Traditional behavioral and cognitive neuroscience have yet to provide satisfactory answers The Archaeology of Mind presents an affective neuroscience approach which takes into consideration basic mental processes brain functions and emotional behaviors that all mammals share to locate the neural mechanisms of emotional expression It reveals for the first time the deep neural sources of our values and basic emotional feelings This book elaborates on the seven emotional systems that explain how we live and behave These systems originate in deep areas of the brain that are remarkably similar across all mammalian species When they are disrupted we find the origins of emotional disorders SEEKING how the brain generates a euphoric and expectant response FEAR how the brain responds to the threat of physical danger and death RAGE sources of irritation and fury in the brain LUST how sexual desire and attachments are elaborated in the brain CARE sources of maternal nurturance GRIEF sources of non sexual attachments PLAY how the brain generates joyous rough and tumble interactions SELF a hypothesis explaining how affects might be elaborated in the brain The book offers an evidence based evolutionary taxonomy of emotions and affects and as such a brand new clinical paradigm for treating psychiatric disorders in clinical practice **Cinéma&Cie. International Film Studies Journal** Aa. Vv.,2015-08-03T00:00:00+02:00 Over the last two decades discoveries made in the field of cognitive neuroscience have begun to permeate humanities and social sciences This special issue of Cin ma Cie focuses on major conceptual and epistemological arguments arising from the dialogue between audiovisual studies and neurosciences In the context of this intersection Neurofilmology is an interdisciplinary research program that arises at the encounter between two models of viewer theviewer as mind deriving from a cognitive analytical approach and the viewer as body typical of the phenomenological continental approach Accordingly Neurofilmology focuses on the viewer as organism by investigating with both empirical and speculative epistemological tools the subject of audiovisual experience postulated as embodied embedded enacted extended emerging affective and relational *Kinesis* Christina Clark,Edith Foster,Judith P. Hallett,2015-08-20 Kinesis The Ancient Depiction of Gesture Motion and Emotionanalyzes the depiction of emotions gestures and nonverbal

behaviors in ancient Greek and Roman texts and considers the precise language depicting them Individual contributors examine genres ranging from historiography and epic to tragedy philosophy and vase decoration They explore evidence as disparate as Pliny's depiction of animal emotions Plato's presentation of Aristophanes' hiccups and Thucydides' use of verb tenses Sophocles' deployment of silence is considered as are Lucan's depiction of death and the speaking objects of the medieval Alexander Romance Ancient authors' depictions of emotion gesture and nonverbal behavior are intrinsically relevant to psychological social and anthropological studies of the ancient world and are perhaps even more important to those who study the texts themselves and try to understand them The volume will be relevant to scholars studying Greek and Roman society and literature as well as to those who study the imitation of ancient literature in later societies Since jargon is avoided and all passages in ancient languages are translated the volume will be suitable for students from the upper undergraduate level Contributors in addition to the volume editors include Jeffrey Rusten Rosaria Vignolo Munson Hans Peter Stahl Carolyn Dewald Rachel Kitzinger Deborah Boedeker Daniel P. Tompkins John Marincola Carolin Hahnemann Ellen Finkelpearl Hanna M. Roisman Eliot Wirshbo James V. Morrison Bruce Heiden Daniel B. Levine and Brad L. Cook

Beyond the Aesthetic and the Anti-Aesthetic James Elkins, Harper Montgomery, 2013-08-20 Each of the five volumes in the Stone Art Theory Institutes series and the seminars on which they are based brings together a range of scholars who are not always directly familiar with one another's work The outcome of each of these convergences is an extensive and unpredictable conversation on knotty and provocative issues about art This fourth volume in the series *Beyond the Aesthetic and the Anti-Aesthetic* focuses on questions revolving around the concepts of the aesthetic the anti-aesthetic and the political The book is about the fact that now almost thirty years after Hal Foster defined the anti-aesthetic there is still no viable alternative to the dichotomy between aesthetics and anti- or nonaesthetic art The impasse is made more difficult by the proliferation of identity politics and it is made less negotiable by the hegemony of anti-aesthetics in academic discourse on art The central question of this book is whether artists and academicians are free of this choice in practice in pedagogy and in theory The contributors are Stephanie Benzaquen J. M. Bernstein Karen Busk Jepsen Luis Camnitzer Diarmuid Costello Joana Cunha Leal Angela Dimitrakaki Alexander Dumbadze T. Brandon Evans Geng Youzhuang Boris Groys Beata Hock Gordon Hughes Michael Kelly Grant Kester Meredith Kooi Cary Levine Sunil Manghani William Mazzarella Justin McKeown Andrew McNamara Eve Meltzer Nadja Millner Larsen Maria Filomena Molder Carrie Noland Gary Peters Aaron Richmond Lauren Ross Toni Ross Eva Schürmann Gregory Sholette Noah Simblis Jon Simons Robert Storr Martin Sundberg Timotheus Vermeulen and Rebecca Zorach

[Encyclopedia of Animal Behavior: D-P](#) Marc Bekoff, 2004 Entries examine a broad array of different species and behavior patterns using techniques that range from molecular approaches to the study of behavior to analyses of individuals populations species and ecosystems

American Journal of Play, 2008 *The Science of Emotional Intelligence* Gerald Matthews, Moshe Zeidner, Richard D. Roberts, 2007 During the past decade emotional intelligence has

been subjected to both scientific and public scrutiny Numerous articles have been published on the topic in both academic journals and the popular press testifying to the potential usefulness of emotional intelligence in psychology business education the home and the workplace However until now there has been no systematic synthesis that grounds emotional intelligence in contemporary theory while simultaneously sorting scientific approaches from popular fads and pseudoscience Bringing together leading international experts from a variety of sub disciplines this volume aims to integrate recent research on emotional intelligence The contributors address a set of focused questions concerning theory measures and applications How does emotional intelligence relate to personality What is the optimal approach to testing emotional intelligence How can emotional intelligence be trained In the final section of the book the volume editors distill and synthesize the main points made by these experts and set forth an agenda for building a science of emotional intelligence in the future Science of Emotional Intelligence will be an invaluable resource for researchers and professionals in psychology education the health sciences and business

Animal Emotions Christian Montag, Kenneth L. Davis, 2020 Animal Emotions How They Drive Human Behavior gives a concise overview of ancient mammalian emotions deeply rooted in the human brain Jaak Panksepp a world renowned neuroscientist dedicated his life career to the study of mammalian emotions and he carved out seven distinct emotional systems he called seeking lust care and play positive emotions and fear anger and sadness negative emotions all exerting a tremendous influence on human behavior Christian Montag a neuroscientist and psychologist and a long time collaborator of Jaak Panksepp revisits together with Kenneth L Davis one of Jaak s PhD students Panksepp s theories and provides the reader with new insights into the nature of emotions and their role as survival tools both for animals and for humans They also raise new questions about the background of the research field Jaak Panksepp coined Affective Neuroscience How are personality and psychopathology linked to animal emotions Do animals feel the same way as we do What are our emotional needs in a digital society and what is key to a happy life

The Animal Ethics Reader Susan Jean Armstrong, Richard George Botzler, 2008 This volume provides a comprehensive anthology of readings on this substantial area of study and interest The book is designed to appeal to anyone interested in tracing the history of the subject as well as providing a powerful insight into the debate as it has developed

Drawing The Line Steven M. Wise, 2002-05 More than just a book about animal rights this work is about equality liberty freedom and justice expressed within a scientific religious legal and philosophical framework

Emotion Science Elaine Fox, 2008-06 Publisher supplied data Elaine Fox is Professor of Psychology at the University of Essex She lectured at Victoria University of Wellington New Zealand and University College Dublin before taking up her current role in 1994 She was Associate Editor of Cognition and Emotion from 1996 until 2001 and is carrying out research at the Medical Research Council s Cognition and Brain Science s Unit in Cambridge
