A History of Mathematics in the United States and Canada
 David E. Zitarelli, Della Dumbaugh, Stephen F. Kennedy, 2022-07-28 This is the first truly comprehensive and thorough history of the development of a mathematical community in the United States and Canada This second volume starts at the turn of the twentieth century with a mathematical community that is firmly established and traces its growth over the next forty years at the end of which the American mathematical community is pre eminent in the world In the preface to the first volume of this work Zitarelli reveals his animating philosophy I find that the human factor lends life and vitality to any subject History of mathematics in the Zitarelli conception is not just a collection of abstract ideas and their development It is a community of people and practices joining together to understand perpetuate and advance those ideas and each other Telling the story of mathematics means telling the stories of these people their accomplishments and triumphs the institutions and structures they built their interpersonal and scientific interactions and their failures and shortcomings One of the most hopeful developments of the period 1900 1941 in American mathematics was the opening of the community to previously excluded populations Increasing numbers of women were welcomed into mathematics many of whom including Anna Pell Wheeler Olive Hazlett and Mayme Logsdon are profiled in these pages Black mathematicians were often systemically excluded during this period but in spite of the obstacles Elbert Frank Cox Dudley Woodard David Blackwell and others built careers of significant accomplishment that are described here The effect on the substantial community of European immigrants is detailed through the stories of dozens of individuals In clear and compelling prose Zitarelli

Dumbaugh and Kennedy spin a tale accessible to experts general readers and anyone interested in the history of science in North America

WW2 Codebreaking Events and Organisations Ronald Koorm,2025-07-10 The second volume of a series on a glossary of codebreaking WW2 Codebreaking Events and Organisations brings to the reader an easily understandable account and listing of those organisations involved in collecting and analysing military intelligence principally during the second world war A listing of key events or occurrences is provided which moulded the direction of codebreaking and gathering of enemy intelligence Whilst Bletchley Park was the HQ of codebreaking activities in wartime numerous organisations became involved in a support role and this became critical when more advanced enemy encoding machines were introduced by the Nazis The evolution of certain organisations over time can be tracked to a degree by reading the glossary in depth The entries are cross referenced to enable the reader to research as much or as little as they want to dip in to the glossary to use it as a basis for further study or just to learn a little more about the people and organisations that helped us win the war with our allied friends

The Society-Individual Conflict in Morten Tyldum's Film "The Imitation Game" (2014) Karina Kovalenko,2016-06-09 Essay from the year 2016 in the subject Communications

Interpersonal Communication grade 86 LCC International University course Interpersonal Communication language English abstract The Imitation Game 2014 is a historical drama movie directed by Morten Tyldum based on the book Alan Turing The Enigma by Andrew Hodges The film is about life of a famous British mathematician and cryptanalyst Alan Turing who is famous by the deciphering of the German Enigma coding machine during the World War II On the one hand the movie tells a story of a person with a brilliant mind who changed the course of the world history but on the other hand this film is a personal drama that depicts complicated relationships between Alan and other people Alan has lack of communication skills and his perception of the reality differs from others ones Being misunderstood and rejected by people because of the peculiarity during his college years Turing closes himself from the world except one friend At the beginning of the World War II he joins the secret cryptographists team creates a computer prototype machine and solves the Enigma mystery The film brightly shows main character s communication difficulties and his inability to collaborate in a team After years being caught by a policeman executed and suffered from the punishment the only one person who could understand him Joan Clarke visits him and witnesses his mental and health problems the results of the execution I found it very interesting to analyze the development of the relationships between Turing and other people in the movie how he confronts and deals with life and communication difficulties and also Turing s personality The film s thread of society s suppressing on Alan and eventually death from it also shows an inability of the society to accept extraordinary individuals That is why I chose three themes to analyze and provide examples from the film perception identity and relationship maintenance The purpose of my paper is to show that Alan Turing tries to understand the society but the society does not want to understand and to admit him
