Keeping it playful and a bit adventurous is going to make it more fun and will progress the relationship to the point you both want. Here are some of the steps that you can take in order to make your date texting better for the both of you. Be bold and playful; this might be difficult in the beginning but after getting more used to your partner you will find that this is easier to do. You will be teetering on the edge of being cocky while still funny, making her laugh in the process and having some fun. You should have a playful banter that goes back and forth and is a little bit silly to make the both of you laugh and feel like you are connecting on a deeper level. Do not become needy; sometimes it is easy to just bug your partner and make them feel like you have nothing else to do with your day then to text them nonstop. While it is great that you have an interest in talking with them and finding out how they are doing, you need to share some time telling them some of the things that you have done. Instead of just asking them what they are doing all of the time, add in what you are doing. Say something like, "I am at the store getting some groceries, how about you?" Keep most texting brief; there will be times when the two of you might spend all day talking together and sharing secrets with each other but this does not have to be every day. There will be times especially in the beginning when you just share a few quick texts and that will be enough. You do not want to start off too intensely when the relationship is new. This book gives a comprehensive guide on the following: What is an alpha male? A modern perspective. How to take control of your attention. How posture affects your physical and mental health.
