The Full Facts Book of Cold Reading Ian Rowland, 2001 *Scream* Margee Kerr, 2015-09-29 Shiver inducing science not for the faint of heart No one studies fear quite like Margee Kerr A sociologist who moonlights at one of America's scariest and most popular haunted houses she has seen grown men laugh cry and push their loved ones aside as they run away in terror And she's kept careful notes on what triggers these responses and why Fear is a universal human experience but do we really understand it If we're so terrified of monsters and serial killers why do we flock to the theaters to see them Why do people avoid thinking about death but jump out of planes and swim with sharks For Kerr there was only one way to find out In this eye opening adventurous book she takes us on a tour of the world's scariest experiences into an abandoned prison long after dark hanging by a cord from the highest tower in the Western hemisphere and deep into Japan's mysterious suicide forest She even goes on a ghost hunt with a group of paranormal adventurers Along the way Kerr shows us the surprising science from the newest studies of fear what it means how it works and what it can do for us Full of entertaining science and the thrills of a good ghost story this book will make you think laugh and scream **The Myth of an Afterlife** Michael Martin, Keith Augustine, 2015-03-12 Because every single one of us will die most of us would like to know what if anything awaits us afterward not to mention the fate of lost loved ones Given the nearly universal vested interest in deciding this question in favor of an afterlife it is no surprise that the vast majority of books on the topic affirm the reality of life after death without a backward glance But the evidence of our senses and the ever gaining strength of scientific evidence strongly suggest otherwise In *The Myth of an Afterlife The Case against Life after Death* Michael Martin and Keith Augustine collect a series of contributions that redress this imbalance in the literature by providing a strong comprehensive and up to date casebook of the chief arguments against an afterlife Divided into four separate sections this collection opens with a broad overview of the issues as contributors consider the strongest evidence of whether or not we survive death in particular the biological basis of all mental states and their grounding in brain activity that ceases to function at death Next contributors consider a host of conceptual and empirical difficulties that confront the various ways of surviving death from bodiless minds to bodily resurrection to any form of posthumous survival Then essayists turn to internal inconsistencies between traditional theological conceptions of an afterlife heaven hell karmic rebirth and widely held ethical principles central to the belief systems supporting those notions In the final section authors offer critical evaluations of the main types of evidence for an afterlife Fully interdisciplinary *The Myth of an Afterlife The Case against Life after Death* brings together a variety of fields of research to make that case including cognitive neuroscience philosophy of mind personal identity philosophy of religion moral philosophy psychical research and anomalistic psychology As the definitive casebook of arguments against life after death this collection is required reading for any instructor researcher and student of philosophy religious studies or theology
