Archaeology's Visual Culture Roger Balm, 2015-12-14 Archaeology's Visual Culture explores archaeology through the lens of visual culture theory The insistent visuality of archaeology is a key stimulus for the imaginative and creative interpretation of our encounters with the past Balm investigates the nature of this projection of the visual revealing an embedded subjectivity in the imagery of archaeology and acknowledging the multiplicity of meanings that cohere around artifacts archaeological sites and museum displays Using a wide range of case studies the book highlights how archaeologists can view objects and the consequences that ensue from these ways of seeing Throughout the book Balm considers the potential for documentary images and visual material held in archives to perform cultural work within and between groups of specialists With primary sources ranging from the mid nineteenth to the early twenty first century this volume also maps the intellectual and social connections between archaeologists and their peers Geographical settings include Britain Cyprus

Mesoamerica the Middle East and the United States and the sites of visual encounter are no less diverse ranging from excavation reports in salvage archaeology to instrumentally derived data sets and remote sensing imagery By forensically examining selected visual records from published accounts and archival sources enduring tropes of representation become apparent that transcend issues of style and reflect fundamental visual sensibilities within the discipline of archaeology

Orientalness Björn A. Schmidt,2017 In the early twentieth century Hollywood was fascinated by the Far East Chinese immigrants however were excluded since 1882 and racism pervaded U S society When motion pictures became the most popular form of entertainment immigration and race were heavily debated topics *Visualizing Orientalness* is the first book that analyses the significance of motion pictures within these discourses Taking up approaches from the fields of visual culture studies and visual history Björn A Schmidt undertakes a visual discourse analysis of films from the 1910s to 1930s The author shows how the visuality of films and the historical discourses and practices that surrounded them portrayed Chinese immigration and contributed to notions of Chinese Americans as a foreign and other race *The Sensory Studies Manifesto*

David Howes,2022-08-31 The senses are made not given This revolutionary realization has come as of late to inform research across the social sciences and humanities and is currently inspiring groundbreaking experimentation in the world of art and design where the focus is now on mixing and manipulating the senses *The Sensory Studies Manifesto* tracks these transformations and opens multiple lines of investigation into the diverse ways in which human beings sense and make sense of the world This unique volume treats the human sensorium as a dynamic whole that is best approached from historical anthropological geographic and sociological perspectives In doing so it has altered our understanding of sense perception by directing attention to the sociality of sensation and the cultural mediation of sense experience and expression David Howes challenges the assumptions of mainstream Western psychology by foregrounding the agency interactivity creativity and wisdom of the senses as shaped by culture *The Sensory Studies Manifesto* sets the stage for a radical reorientation of research in the human sciences and artistic practice Public Theology and the Importance of Visual Culture Toine van den

Hoogen,2024-04-23 This book asserts the importance of conducting research on visual culture phenomena in public theology As we increasingly communicate and express our social and cultural identities through images in today s culture and economy visual culture has become a burgeoning area of study and research in many academic institutions In light of this public theology must engage with this complex field The concept of iconicity is raising fresh inquiries within the realm of public theology which is already rife with hermeneutic concerns These questions must be revisited as images compel us to

reassess our ongoing approach to the interpretation of religion The potency of images is an uncharted and potent force propelling public theology towards a future that is yet to be discovered

The Book of Revelation and the Visual Culture of Asia Minor Andrew R. Guffey, 2019-10-10 The images in the book of Revelation confound even the most seasoned of interpreters In this book Andrew R Guffey argues that part of the confusion stems from the fact that the book of Revelation was first and foremost a work to be seen but that few interpreters address the viscosity of the book The Book of Revelation and the Visual Culture of Asia Minor describes a connection between rhetorical discussions of ekphrasis visual culture and John s images a concurrence of images using theory and thick historical description Guffey s analysis situates the text and its rhetorical performativity in the context of ancient visual and rhetorical culture arguing that Revelation is not merely a work of literary craft but also of visual culture

Visual Cultures in Science and Technology Klaus Hentschel, 2014 This book aims to provide a synthesis of the history generation use and transfer of images in scientific practice It delves into the rich reservoir of case studies on visual representations in

scientific and technological practice that have accumulated over the past couple of decades by historians sociologists and philosophers of science The main aim is thus located on the meta level It adopts an integrative view of recurrently noted general features of visual cultures in science and technology something hitherto unachieved and believed by many to be a mission impossible By systematic comparison of numerous case studies the purview broadens away from myopic microanalysis in search of overriding patterns The many different disciplines and research areas involved encompass mathematics technology natural history medicine the geosciences astronomy chemistry and physics The chosen examples span the period from the Renaissance to the late 20th century The broad range of visual representations in scientific practice is treated as well as schooling in pattern recognition design and implementation of visual devices and a narrowing in on the special role of illustrators and image specialists

Visual Culture Richard Howells, Joaquim Negreiros, 2019-04-08 This is a book about how to read visual images from fine art to photography film television and new media It explores how meaning is communicated by the wide variety of texts that inhabit our increasingly visual world But rather than simply providing set meanings to individual images Visual Culture teaches readers how to interpret visual texts with their own eyes While the first part of the book takes readers through differing theoretical approaches to visual analysis the second part shifts to a medium based analysis connected by an underlying theme about the complex relationship between visual culture and reality Howells and Negreiros draw together seemingly diverse methodologies while ultimately arguing for a polysemic approach to visual analysis The third edition of this popular book contains over fifty illustrations for the first time in colour Included in the revised text is a new section on images of power fear and seduction a new segment on video games as well as fresh material on taste and judgement This timely edition also offers a glossary and suggestions for further reading Written in a clear lively and engaging style Visual Culture continues to be an ideal introduction for students taking courses in visual culture and communications in a range of disciplines including media and cultural studies sociology and art and design
