equality The new afterword focuses on the continuing impact of the crisis and the response to it in 2010 One of Huffington Post's Best Social and Political Awareness Books of 2010 Winner of the Isaac and Tamara Deutscher Memorial Prize for 2010 Praise for the Hardcover A lucid and penetrating account of how the power of capital shapes our world Andrew Gamble Independent Elegant entertainingly swashbuckling Harvey's analysis is interesting not only for the breadth of his scholarship but his recognition of the system's strengths John Gapper Financial Times [A Companion to Marx's Capital](#) David Harvey, 2010-03-01 My aim is to get you to read a book by Karl Marx called Capital Volume 1 and to read it on Marx's own terms The biggest financial crisis since the Great Depression has generated a surge of interest in Marx's work in the effort to understand the origins of our current predicament For nearly forty years David Harvey has written and lectured on Capital becoming one of the world's most foremost Marx scholars Based on his recent lectures this current volume aims to bring this depth of learning to a broader audience guiding first time readers through a fascinating and deeply rewarding text A Companion to Marx's Capital offers fresh original and sometimes critical interpretations of a book that changed the course of history and as Harvey intimates may do so again David Harvey's video lecture course can be found here davidharvey.org reading capital

Metromarxism Andrew Merrifield, 2013-04-15 Metromarxism discusses Marxism's relationship with the city from the 1850s to the present by way of biographical chapters on figures from the Marxist tradition including Marx Walter Benjamin Guy Debord and David Harvey Each chapter combines interesting biographical anecdotes with an accessible

analysis of each individual's contribution to an always transforming Marxist theory of the city. He suggests that the interplay between the city as center of economic and social life and its potential for progressive change generated a major corpus of work. That work has been key in advancing progressive political and social transformations. *The Political Economy of China's Infrastructure Development in Africa* Tim Zajontz, 2023-11-23. This book sheds light on structural drivers that led to the Chinese omnipresence in African infrastructure markets and offers a strategic relational approach to the study of African agency in Sino-African infrastructure encounters. Case studies cover the Tanzania Zambia Railway Authority TAZARA Zambia's road sector as well as Tanzania's Bagamoyo port and Standard Gauge Railway. It is shown that African state agency in the infrastructure sector is contingent upon dynamic state-society relations and distinct political-economic contexts and constraints. The book problematises contradictions related to infrastructure debt, the emergence of Sino-African public-private partnerships and the intensifying geopolitics cum geoeconomics of infrastructure across Africa. *The Internet Society in China* Shaojie Liu, Jianmin Wang, 2019-08-01. This book provides a cutting-edge analysis of the rapid rise of China's network society and reviews recent key developments within China's internet economy, notably the concepts of Lucky Money and E-Business on Wechat and Crowd Funding Platforms. It focuses on drawing out the sociological impact of these economic developments, examining among others the bearing of the decentralization of e-business in rural areas. It offers a vital sociological perspective on the development of China's internet society and how it affects social and professional relations, examining the shift from the traditional Red Envelope Giving Culture to Digital Red Envelope micro-charity 2.0 as well as the Rise of Internet Crowd Funding in China. Combining an up-to-date analysis of the current state of play of China's internet society with expertise in the rapidly changing landscape of China's social media, this book provides key insights into how technology impacts on the communication and movement of population in China in both social and economic spheres.

Spaces of Global Capitalism David Harvey, 2019-03-12. Fiscal crises have cascaded across much of the developing world with devastating results from Mexico to Indonesia, Russia and Argentina. The extreme volatility in contemporary economic fortunes seems to mock our best efforts to understand the forces that drive development in the world economy. David Harvey, the single most important geographer writing today and a leading social theorist of our age, offers a comprehensive critique of contemporary capitalism. In this fascinating book, he shows the way forward for just such an understanding, enlarging upon the key themes in his recent work: the development of neoliberalism, the spread of inequalities across the globe and space as a key theoretical concept. Both a major declaration of a new research programme and a concise introduction to David Harvey's central concerns, this book will be essential reading for scholars and students across the humanities and social sciences. **Properties of Rent** Sushmita Pati, 2022-08-25. We live in cities whose borders have always been subject to expansion. What does such transformation of rural spaces mean for cities and vice versa? This book looks at the spatial transformation of villages brought into the Delhi's urban fray in the 1950s. As these villages transform

physically their residents an agrarian pastoralist community the Jats also transform into dabblers in real estate A study of two villages Munirka and Shahpur Jat both in the heart of bustling urban economies of Delhi reveal that it is rent that could define this suburbanisation Bhaichara once a form of land ownership in colonial times transforms into an affective claim of belonging and managing urban property in the face of a steady onslaught from the city Properties of Rent is a study of how vernacular form of capitalism and its various affects shape up in opposition to both state finance capital and the city in contemporary urban Delhi

Left Coast City Richard Edward DeLeon, 1992 This book provides insight into how San Francisco's progressive coalition developed between 1975 and 1991 what stresses emerged to cause splintering within the coalition and how it fell apart in the 1991 mayoral campaign DeLeon analyzes the success and failures of the progressive movement as it toppled the business dominated pro growth regime imposed stringent controls on growth and development and achieved political control of city hall

A Companion to Marx's Grundrisse David Harvey, 2023-02-07 When leading scholar of Marx Roman Rosdolsky first encountered the virtually unknown text of Marx's Grundrisse his preparatory work for his masterpiece Das Capital in the 1950s in New York Public Library he recognized it as a work of fundamental importance but declared its unusual form and obscure manner of expression made it far from suitable for reaching a wide circle of readers David Harvey's Companion to Marx's Grundrisse builds upon his widely acclaimed companions to the first and second volumes of Capital in a way that will reach as wide an audience as possible Marx's stated ambition for this text where he was thinking aloud about some of possible metamorphoses of capitalism is to reveal the exact development of the concept of capital as the fundamental concept of modern economics just as capital itself is the foundation of bourgeois society While respecting Marx's desire to bring out all the contradictions of bourgeois production as well as the boundary where it drives beyond itself David Harvey also pithily illustrates the relevance of Marx's text to understanding the troubled state of contemporary capitalism

The Story of Capital David Harvey, 2026-02-03 The world's leading Marxist geographer and economist guides general readers through major concepts in capitalism and Marx's masterwork For decades David Harvey has been teaching Marx's work particularly Capital to great acclaim He has analysed chapter by chapter sometimes line by line Marx's three volumes and the Grundrisse This new book opens up the mental universe of that work for a general reader In The Story of Capital Harvey takes a synoptic approach to the conceptual architecture as a whole and guides us through the key moments from labour and technology to the state and geopolitics via the profit rate social reproduction the relationship to nature fictitious capital and the return of the rentiers In doing so Harvey has produced a work which will become a key reference for all those trying to grasp the nature of contemporary capitalism
