Aesthetics: Key Concepts in Philosophy Daniel Herwitz, 2008-07-09 An introduction to aesthetics for the student encountering this key philosophical subdiscipline for the first time **Aesthetics** Daniel Alan Herwitz, 2008 Aesthetics is the branch of philosophical thought that arises from engagement with the arts It is about larger issues such as meaning identity and medium that arise in the exploration of art music film and literature Aesthetics Key Concepts in Philosophy offers a thorough lucid and stimulating account of the central theories and ideas encountered in aesthetics The text is thematically structured covering the discipline's principal concepts taste aesthetic judgment aesthetic experience and the definition of art Ideal for students across the arts and humanities the book stresses *Aesthetics, Arts, and Politics in a Global World* Daniel Herwitz, 2017-01-26 A different set of purposes define culture today than those that preoccupied the world in the immediate decades of decolonization Focusing on art and music in diverse parts of the world Daniel Herwitz explores a world that has largely shifted from the earlier days of nationalism decolonization and cultural exclusion to one of global markets and networks Using examples from India and Mexico to South Africa Australia and China Herwitz argues that the cultural politics and art being produced in these places are now post postcolonial Where the postcolonial downplayed formerly Eurocentric forms and celebrated art with national consciousness the rules for 21st century cultural authenticity are quickly disappearing Young people think of themselves in relation to global culture rather than nation building the project of producing a new and modern art for the incipient and rising postcolonial nation is out of date By examining the shift in which art accesses the past and the rise of trends such as hitching consumer culture to celebrity forms and branding Herwitz's original and engaging exploration of contemporary art captures the ways in which art has given way to a new form of production altering everything from the role of tradition and heritage in contemporary art to the terms of its vision and circulation **New Philosophies of Film** Robert Sinnerbrink, 2011-10-13 This is a critical exploration of analytic and Continental philosophies of film which puts film philosophy into practice with detailed discussions of three filmmakers The book includes philosophical readings of three key contemporary filmmakers Malick Lynch and Von Trier It also features links to online resources guides to further reading and a filmography Politics: Key Concepts in Philosophy Iain MacKenzie, 2009-07-24 An introduction to political philosophy for the student encountering this key philosophical subdiscipline for the first time **Architecture in Black** Darell Wayne Fields, 2015-03-12 Based on analysis of historical philosophical and semiotic texts Architecture in Black presents a systematic examination of the theoretical relationship between architecture and blackness Now updated this original study draws on a wider range of case studies highlighting the racial techniques that can legitimize modern historicity philosophy and architectural theory Arguing that architecture as an aesthetic practice and blackness as a linguistic practice operate within the same semiotic paradigm Darell Fields employs a technique whereby works are related through the repetition and revision of their semiotic structures Fields reconstructs the genealogy of a black racial subject represented by

the simultaneous reading of a range of canonical texts from Hegel to Saussure to Henry Louis Gates Jr Combining an historical survey of racial discourse with new readings resulting from advanced semiotic techniques doubling as spatial arrangements Architecture in Black is an important contribution to studies of the racial in Western thought and its impact on architecture space and time

Turntables and Tropes Scott Haden Church,2022-03-01 The creative practice of remix is essential to contemporary culture as the proliferation of song mashups political remix videos memes and even streaming television shows like Stranger Things demonstrates Yet remix is not an exclusively digital practice nor is it even a new one as there is evidence of remix in the speeches of classical Greek and Roman orators Turntables and Tropes is the first book to address remix from a communicative perspective examining its persuasive dimensions by locating its parallels with classical rhetoric Through identifying recontextualizing mashing up and applying rhetorical tropes to contemporary digital texts and practices this groundbreaking book presents a new critical vocabulary that scholars and students can use to analyze remix Building upon scholarship from classical thinkers such as Isocrates Quintilian N g rjuna and Cicero and contemporary luminaries like Kenneth Burke Richard Lanham and Eduardo Navas Scott Haden Church shows that an understanding of rhetoric offers innovative ways to make sense of remix culture
