**Management 4.0** Alfred Oswald, Wolfram Müller, 2018-03-26 Management 4.0 Handbook for Agile Practices Release 2

**Projects, Government, and Public Policy** Stanisław Gasik, 2022-11-25 Many governments have effectively organized public project implementation systems in their jurisdictions At the same time many other countries remain at a less advanced level of public project management Globally there is a need for project management knowledge to be transferred between governments However no systematic review of these practices has been developed to date Projects Government and Public Policy was written to fulfill this need and presents a review of project management practices in countries with developed project based capabilities This book uses its own rigorous model to present this review systematically This book's practical purpose is to give a structured overview of government level project management practices This knowledge can be used in the work of governments to improve the management of public projects and the implementation of public policies Many professionals working in public institutions understand project management concepts differently than project management professionals Therefore this book begins with a chapter that describes the differences between the conceptual basis of public administration and project management The body of this book has five parts Part I is mainly intended for those involved in government and public administration who want to acquire or increase knowledge about project management Part II provides an overview of the basic concepts from the theory of public administration public policies and development management Part III describes what makes public projects unique and the success factors specific to projects of this sector Knowledge about effective government project management practices is covered in Part IV The concluding Part V begins with a general overview of the maturity model concept Its main part covers the description of a maturity model showing ways to systematically improve the implementation of public projects This book is written for

governments and government administrators including the most influential decision makers who craft policies to guide a country's development as well as how to implement projects. This book is also intended for supporters and enthusiasts of project management in government and public administration by providing them with a description of the solutions used by project management in public administration. This book is intended too for all project management practitioners working for public projects, project managers, team members, sponsors, and middle level executives of project delivering private companies. By knowing public administration concepts they can manage their projects better and use a common language with their clients.

**Dynamic Business Process Management in the Knowledge Economy** Marek Szelągowski, 2019-06-21. This book describes modern dynamic business process management (dynamic BPM) which is considerably different from traditional BPM from 20, 10, or even 5 years ago. It demonstrates why traditional BPM is not sufficient in the knowledge economy (KE) while also highlighting the opportunities provided by dynamic BPM, the form of management that practitioners and academics deal with on a daily basis. This involves mastering and implementing e.g. case management, process mining, and RPA and integrating them with knowledge management. But more importantly, dynamic BPM makes full use of the dynamism of knowledge workers, the people who actually create innovative products and services tailored to the specific needs of clients. The book was primarily written for those managers who see advantageous opportunities amidst the ongoing changes. Accordingly, it focuses more on innovations emerging from practice than on theoretical academic reflection. In addition to helping organizations operating in the KE to prepare for and implement process management, the book is intended as a source of inspiration for process management researchers and iBPMS system vendors.
