

4. One of the perks of the job is that you often get to test the products you are investigating. Your editor has given you an iPod and \$250 to purchase songs and videos to test it out. You want to give your readers some idea of their downloading options. You assume that most people have, on average, 45 times more songs than they do videos. Complete the following chart.

| # of Videos | # of Songs | Total Cost | Total Size of Files |
|-------------|------------|------------|---------------------|
| 1           | 45         | \$59.54    | 1761 MB / 1.7 GB    |
| 2           | 90         | \$119.08   | 3522 MB / 3.4 GB    |
| 3           | 135        | \$178.62   | 5283 MB / 5.1 GB    |
| 4           | 180        | \$238.16   | 7044 MB / 6.9 GB    |
| 5           | 225        | \$297.70   | 8805 MB / 8.6 GB    |

5. Let us assume that you bought a 16 GB iPod nano and downloaded two movies for it. Construct an inequality to determine the number of songs that will fit on it. In all ways, be sure to define your variables and solve the inequality.

Size of songs that can fit  
 $2(16)(1024) + 50 \leq 16(1024)$   
 $3072 + 50 \leq 16384$   
 $3122 \leq 16384$   
 $13262 \leq 16384$

6. You hear that Apple is planning to introduce a 24 GB iPod nano this summer. For what price do you estimate it will sell? Be sure to explain your reasoning.

$\$249$   
 $\$349$   
 $\$279$   
 $\$349$

7. The ad that you found also mentioned that a fully charged 16 GB nano can play "Up to 24 hours of music when fully charged." About how many songs can you play before it runs out of power?

$2000 \div 3.15$   
 $615 \text{ songs}$   
 $(443) \text{ songs}$   
 $154 \text{ songs}$

8. Since computers are continually getting smaller and smaller and can hold more and more information, there is a possibility that one day there will be a one terabyte (TB) iPod. Find out how large a terabyte is and use that information to estimate what it would cost to load a one-TB iPod with movies.

$1 \text{ TB} = \frac{1024 \text{ GB}}{1.5 \text{ GB}} = 682 \times \$14.99$   
 $\$10223.18$

*Intelligent Tutoring Systems* Barry P. Goettl, Henry M. Halff, Carol L. Redfield, Valerie J. Shute, 2003-06-29

The first International Conference on Intelligent Tutoring Systems ITS was held ten years ago in Montreal ITS 88 It was so well received by the international community that the organizers decided to do it again in Montreal four years later in 1992 and then again in 1996 ITS 98 differs from the previous ones in that this is the first time the conference has been held outside of Montreal and it s only been two years not four since the last one One interesting aspect of the ITS conferences is that they are not explicitly bound to some organization e g IEEE or AACE Rather the founder of these conferences Claude Frasson started them as a means to congregate researchers actively involved in the ITS field and provide a forum for presentation and debate of the most currently challenging issues Thus the unifying theme is science This year s hot topics differ from those in the earlier ITS conferences as they reflect ever changing trends in ITS research A few of the issues being examined at ITS 98 include Web based tutoring systems deploying ITS in the real world tutoring and authoring tools architectures and knowledge structure and representation

Large-Scale Studies in Mathematics Education James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies
