Charisma has long been seen as a mysterious almost magical quality possessed only by a few extraordinary individuals people like Bill Clinton Steve Jobs or Oprah Winfrey The assumption has been that you are either born with it or destined to live without it Olivia Fox Cabane challenges this belief showing that charisma is not a gift of birth but a skill that can be learned refined and expressed in ways that align with who you already are Drawing from her work with executives leaders and innovators at institutions such as Harvard and MIT Cabane breaks charisma into tangible actionable elements She reveals that charisma is less about natural magnetism and more about practicing a set of behaviors and mindsets that project presence warmth and power It doesn't require you to change your personality only to amplify traits and habits that fit your authentic self By exploring the science behind human interaction and the psychology of influence the book shows that anyone can develop charisma with the right tools and practice Whether through subtle shifts in body language mastering presence in conversation or adjusting how you communicate confidence and empathy charisma becomes something accessible rather than unattainable Cabane's central message is both liberating and practical charisma isn't an accident of birth but a learnable art that can transform the way people perceive and respond to you [A Guide to the Scientific Career](#)

Christopher Arterton,2023 Political managers public office holders legislative staff campaign managers policy advocates and partisan communicators are united by a common language a set of shared skills a strategic mindset and we can hope an appreciation of their professional responsibilities to the institutions of democracy While political managers are divided by vision and purpose the best among them are simultaneously visionaries and manipulators and they balance themselves precariously between these values as they develop and implement strategy Campaigns often more closely resemble war and sports than the world of commercial business and in the political arena achieving victory requires calculated strategy In Strategy in Politics F Christopher Arterton seeks to clarify the meaning of strategy through four perspectives the dynamics of strategic planning the conduct of warfare the theories of persuasive political communications and the logic of interpersonal competition Drawing on classic texts of statesmanship and warfare by Sun Tzu Machiavelli and Clausewitz and complementing those with contemporary understandings of strategic planning communications game theory and military tactics Arterton delineates a defensible method of pursuing victory in politics Recognizing that unbridled pursuit of power can be corrupting Arterton advocates certain guardrails that political managers should live by in their strategic maneuvers and their employment of power In turn Arterton shows those engaged with the institutions of democratic politics how to be adroit in their strategic thinking so that

they may enter this battlefield better prepared for the conflict of ideas Strategy in Politics will help readers to understand the dilemmas inherent in democratic politics between power and purpose between strategy and leadership and between empowerment and manipulation
