Contemporary society has seen an unprecedented rise in both the demand and the desire to be creative to bring something new into the world Once the reserve of artistic subcultures creativity has now become a universal model for culture and an imperative in many parts of society In this new book cultural sociologist Andreas Reckwitz investigates how the ideal of creativity has grown into a major social force from the art of the avant garde and postmodernism to the creative industries and the innovation economy the psychology of creativity and self growth the media representation of creative stars and the urban design of creative cities Where creativity is often assumed to be a force for good Reckwitz looks critically at how this imperative has developed from the 1970s to the present day Though we may well perceive creativity as the realization of some natural and innate potential within us it has rather to be understood within the structures of a very specific culture of the new in late modern society The Invention of Creativity is a bold and refreshing counter to conventional wisdom that shows how our age is defined by radical and restrictive processes of social aestheticization It will be of great interest to those working in a variety of disciplines from cultural and social theory to art history and aesthetics

APICS, the Performance Advantage, 1998 **Dancing on the Glass Ceiling** Don Olcott, Darcy W. Hardy, 2006 In Dancing on the Glass Ceiling Olcott Hardy and the contributors explore ideas about women and leadership examining how they intersect with the growth of technology In order to get a clear picture they have explored the research plus interviewed women in various phases of their

careers as well as men who have witnessed the evolution of women's leadership responsibilities. The book addresses six major questions: Does the glass ceiling exist today and if so how has it manifested itself in the modern organization? What is the historical background and cultural importance of women in the workplace and how has that influenced women's roles in today's marketplace? What skills and talents do successful female leaders see as critical for women to succeed today? Are they the same for men? How has the technology revolution impacted leadership opportunities and challenges for women and men? Are women and men better suited for specific types of leadership roles? How can we build new organizational paradigms that center around the aggregate talents and abilities of women and men? Finally, the book challenges readers to consider these questions in their own work and within their own institutions and as a result to make decisions and plans for a new era.
