The Cambridge Handbook of Linguistic Typology Alexandra Y. Aikhenvald, R. M. W. Dixon, 2017-03-30

Linguistic typology identifies both how languages vary and what they all have in common. This Handbook provides a state of the art survey of the aims and methods of linguistic typology and the conclusions we can draw from them. Part I covers phonological typology, morphological typology, sociolinguistic typology and the relationships between typology, historical linguistics and grammaticalization. It also addresses typological features of mixed languages, creole languages, sign languages and secret languages. Part II features contributions on the typology of morphological processes: noun categorization devices, negation, frustrative modality, logophoricity, switch reference and motion events. Finally, Part III focuses on typological profiles of the mainland South Asia area, Australia, Quechuan and Aymaran, Eskimo-Aleut, Iroquoian, the Kampa subgroup of Arawak, Omotic, Semitic, Dravidian, the Oceanic subgroup of Austronesian and the Awyu-Ndumut family in West Papua. Uniting the expertise of a stellar selection of scholars, this Handbook highlights linguistic typology as a major discipline within the field of linguistics.

Productivity in Argument Selection Amir Zeldes, 2012-12-06

This book centers on the idea that some verbs and other argument structure constructions have an inherently different propensity to realize lexically unfamiliar arguments independently of lexical semantic meaning. This notion is explored both qualitatively using selected examples and quantitatively using large amounts of corpus data in both cases, primarily from English and German.

Encyclopedia of Language & Linguistics E. K. Brown, 2006

Types of Variation Terttu Nevalainen, Juhani Klemola, Mikko Laitinen, 2006-01-01

This volume interfaces three fields of linguistics rarely discussed in the same context. Its underlying theme is linguistic variation and the ways in which historical linguists and dialectologists may learn from insights offered by typology and vice versa. The aim of the contributions is to raise the awareness of these linguistic subdisciplines of each other and to encourage their cross fertilization to their mutual benefit. If linguistic typology is to unify the study of all

types of linguistic variation this variation both diatopic and diachronic will enrich typological research itself With the aim of capturing the relevant dimensions of variation the studies in this volume make use of new methodologies including electronic corpora and databases which enable cross and intralinguistic comparisons dialectally and across time Based on original research and unified by an innovative theme the volume will be of interest to both students and teachers of linguistics and Germanic languages

An Introduction to Applied Linguistics Alan Davies,1999 In this work the author aims to show that applied linguistics is better understood by doing it than studying or reading about it Beginning with the history and definitions of applied linguistics he then looks at the full spectrum of institutional and non institutional uses of language spanning not only language learning and teaching but also language as a socio psychological phenomenon The Western Classical Tradition in Linguistics Keith Allan,2007 The Western Classical Tradition in Linguistics examines ancient medieval post renaissance and modern conceptions of linguistics i e the study of language and languages It identifies a classical tradition to which modern linguistics owes a very clear debt For example Aristotle takes language to be A a symbolic system that represents B the world of our experience as it is contained within the mind He believed C the world is external to human beings who are all capable of D perceiving the same things within it Finally E Aristotle was only interested in form as a corollary of function A E have given rise to different developments in linguistics A is a premise for all linguists but has been developed perhaps to its limits in post Fregean semantics From the last quarter of the 20th century B has been pursued by cognitive linguists C was taken up by the speculative grammarians of the late middle ages who looked to the structure of God s world as informing the structure of universal grammar The rationalists of the seventeenth and eighteenth centuries took up D revising the interpretation of their speculative precursors to seek universal grammar in the God given rational minds of the human beings perceiving the world around them Chomsky reinterprets the rationalist doctrine to seek universal grammar in the human mind while eschewing the relevance of human perception of anything other than linguistic input Functional linguistics has picked up on E So today s formal linguists cognitivists functionalists and Chomskyites may often be at odds with each other but all tread in Aristotle s footprints within the western classical tradition There have been times when linguists stepped outside of the tradition but they nearly always borrowed from

Nominalization, Nomination and Naming Christian Todenhagen,Wolfgang Thiele,2007 **The Baloch and Others**
Carina Jahani,Agnes Korn,Paul Brian Titus,2008 Balochistan has been an important contact zone between the Indian Subcontinent and the Iranian Plateau It is a region where a variety of languages intermingle different religions jostle for attention and traditional ways of living are challenged by modernity The papers in this volume explore Balochistan s linguistic socio political and cultural diversity Balochistan is in many ways a marginalised region in Pakistan Iran and Afghanistan Traditional economies persist but modernity is rapidly gaining ground Tensions between traditionalism and modernity are explored in several articles Other articles examine the impact of economic development in Balochistan Political borders are always problematic and this is particularly so in southwest Asia Only in the late 19th century were the present borders between Iran Afghanistan and Pakistan drawn As modern nation states were consolidated in the 20th century the Baloch found themselves under the dominion of Islamabad and Tehran The Baloch nationalist movement which is treated in a number of articles has been much stronger in former British India Pakistan than in Iran A powerful element of self definition in the Middle East and South Asia is religious belief In Balochistan this may take the form of Balochi Sunni assertions contra Persian Shia ones or attempts by the minority Zikri Baloch to resist mainstream Sunnism Another source of social demarcation is tribal affiliation Thus difference between self and other is not always Baloch versus non Baloch Both religious and social demarcations are discussed in various articles in this volume The Balochi language is the subject of several articles in the volume This language is a conglomerate of dialects with diverging grammatical systems and it is therefore by no means possible to speak of a standard Balochi language Throughout history the Baloch have been in contact with other groups and this has influenced their language In the eastern parts of the Balochi speaking region contact with Indo Aryan languages is particularly intense as it is in the western parts with Persian But other languages are also spoken in Balochistan This has created widespread multilingualism where one language the national language or an international language may be used for reading and writing and Balochi as well as other local languages are used in various oral domains
