

Pearl Harbor By Alondra Sanchez

On December 7, 1941, the Japanese launched a surprise attack on the United States naval base at Pearl Harbor, Hawaii. The attack was intended to prevent the U.S. Pacific Fleet from interfering with Japanese military operations in Southeast Asia. The attack resulted in significant damage to the U.S. fleet and led to the United States' entry into World War II.

The attack on Pearl Harbor was a carefully planned and executed operation by the Japanese military. The Japanese had been planning the attack for months and had assembled a large fleet of ships and aircraft to carry out the mission. The attack began early in the morning of December 7, when Japanese aircraft launched a surprise attack on the U.S. naval base at Pearl Harbor.

The attack was devastating for the United States. The Japanese aircraft destroyed or damaged eight battleships, three cruisers, four destroyers, and several other ships. More than 2,400 Americans were killed and over 1,000 were wounded in the attack.

The attack on Pearl Harbor was a turning point in World War II. Prior to the attack, the United States had remained neutral in the conflict, providing aid to Britain and other Allied powers but not directly engaging in combat. After the attack, however, President Franklin D. Roosevelt declared war on Japan and entered the United States into World War II.

The attack on Pearl Harbor also had significant implications for Japan. While the initial success of the attack was a major victory for Japan, it ultimately led to their defeat in World War II. The United States' entry into the war brought significant resources and manpower to bear against Japan, ultimately leading to their surrender in August 1945.

In conclusion, the attack on Pearl Harbor was a significant event in world history that had far-reaching implications for both the United States and Japan. The surprise attack led to significant damage to the U.S. fleet and resulted in America's entry into World War II. While the attack was a major victory for Japan in the short term, it ultimately led to their defeat in the war.

Hazuka, NAVAL WAR COLL NEWPORT RI., Naval War College, 1993 This paper is an analysis of the Pearl Harbor attack from a operational level of war perspective Its purpose is to provide the reader with a Japanese viewpoint of the Pearl Harbor operation and to determine if there were weaknesses with the plan and its execution The study is limited in scope in that it will focus primarily on a single operation of the Pacific campaign initiated by the Japanese Much has been written about the devastation inflicted upon U S forces by Japan on 7 December 1941 Research initiated for this paper concludes that although the execution of the Pearl Harbor operation was successful the operation did not achieve its strategic aim A mismatch existed between operational and strategic objectives which was partially attributed to flaws in target selection priority and tactical level decision making during execution Japan s narrow objective of destroying primarily capital ships spared important logistical facilities from destruction These support facilities proved to be the key to a quick restoration of U S naval presence in the region Likewise Japan s emphasis on placing a higher target priority for battleships versus carriers allowed a more potent weapon system to essentially escape unscathed This mistake had strategic implications in that aircraft carriers were the key weapon s platform used to destroy the Japanese Navy in later battles in the Pacific Finally the tactical commander s failure to exploit America s military forces at its most vulnerable point minimized further damage which could have been inflicted upon the U S Pacific Fleet anchored at Pearl Harbor **Investigation of the Pearl Harbor Attack.
