China's Air Power and Maritime Strategies Towards the Indian Ocean Region Joshy M. Paul, 2025-02-03 This book examines China's naval and airpower strategic direction towards the Indian Ocean region. It discusses China's military modernization program along with naval and airpower capabilities including expeditionary nature. It analyses China's attempt to gain a strategic dominance in the IOR by means of investments and trade with the littoral countries, military diplomatic relationship with friendly countries, permanent presence of naval systems in the Indian Ocean and delivering public goods throughout the region. A comparative analysis of People's Liberation Army Air Force PLAAF expeditionary capabilities and Indian Air Force's IAF deterrence mechanisms is also included. In *Unsettled Expectations* Eva Mackey draws on ethnographic case studies about land rights conflicts in Canada and the U.S. to argue that critical analysis of present day disputes over land belonging and sovereignty will help us understand how colonization is reproduced today and how to challenge it. Employing theoretical approaches from Indigenous and settler colonial studies and in the context of critical historical and legal analysis Mackey urges us to rethink the assumptions of settler certainty that underpin current conflicts between settlers and Indigenous peoples and reveals settler privilege to be a doomed fantasy of entitlement. Finally Mackey draws on case studies of Indigenous settler alliances to show how embracing difficult uncertainty can be an integral part of undoing settler privilege and a step toward decolonization. **Backpacker**, 2007-09 Backpacker brings the outdoors straight to the reader's doorstep inspiring and enabling them to go more places and enjoy nature more often. Indian National Security Jonathan Mead, 2010 India one billion people one million problems one nation Five thousand years ago Manu took a stroll along the banks of the Ganges Fortuitously for mankind he encountered a fish which warned him of a looming great flood one that would destroy humanity In the aftermath of the devastation Manu's proteges were condemned to a life of suffering Survival was tough They walked the earth and toiled an unforgiving land It seemed natural therefore that man should congregate and by doing so form communities the logic being there was strength in numbers But as cities flourished it soon became apparent that the state represented not only a safe haven for man but also posed a threat to his own security With such a rich history India has all too sadly witnessed this paradox more than most With this in mind the story of this book is simple Man's struggle for survival is the most enduring aspect of a nation's security equation And no better illustration of man's struggle than on the subcontinent where he has been forced to contend with famine poverty illiteracy caste based discrimination communalism internecine conflict invasion terrorism war and the spectre of a nuclear holocaust Amidst this backdrop it may seem ironic that the mainstream interpretation of Indian security has by and large focussed on the military Why then do we gloss over the human aspects of security is it through ignorance or do we feel somewhat queasy when confronted with such stark realities On this note scholars have an obligation to paint an inclusive picture of India's security construct one that encapsulates individual societal political economic military internal and external dimensions This book hopes as Gandhi once remarked to shine the torchlight within and in doing so offer a more comprehensive and realistic assessment of Indian National Security
