financial reporting such as the recording of fictitious revenues could be avoided or at least greatly mitigated. Frauds related to missing duplicated and identical invoices can also be greatly curtailed. As a result, the advent of blockchain will enable auditors to reduce substantive testing as inherent and control audit risks will be reduced, thereby greatly improving an audit's detection risk. As such, the continuing use and popularity of blockchain will mean that auditors and information systems security professionals will need to deepen their knowledge of this disruptive technology. If you are looking for a comprehensive study and reference source on blockchain technology, look no further than *The Auditor's Guide to Blockchain Technology Architecture Use Cases Security and Assurance*. This title is a must read for all security and assurance professionals and students looking to become more proficient at auditing this new and disruptive technology.

Mobile Computing and Technology Applications in Tourism and Hospitality Waluyo, Agustinus Borgy, Tan, Ling, 2022-03-11. Mobile computing and wireless technology have grown at a phenomenal rate in recent years and so has artificial intelligence. The most advanced software applications that the world ever witnessed can be realized through a combined aspect of these disciplines capable of delivering high level support to various industry sectors and to people's quality of life in general. Currently, many countries are facing challenges from the COVID 19 pandemic. One of the most impacted industries by the pandemic is that of tourism and hospitality. It is time to explore and leverage the power of mobile and wireless intelligence to assist with the recovery of the tourism and hospitality sector during and after the pandemic, which constitutes a need for relevant research in the field. *Mobile Computing and Technology Applications in Tourism and Hospitality* presents the latest research and development in mobile and intelligent computing with a focus on tourism and hospitality sectors. The chapters discuss the role of research on innovative technologies and applications for resilience to return the tourism and hospitality industry back to its normal state. This includes research on topics such as sensor based technology, smart tourism, virtual and augmented reality, mobile travel applications and more. This book is ideal for managers, executives, museum and cultural heritage specialists, app developers, IT consultants, tourism and hospitality professionals, researchers, academicians and students.
