Diversity and Equality and Moral Issues

Bioethics and Human Rights Wanda Teays, Alison Dundes Renteln, 2023-12-12

This third edition collection provides a contemporary survey of current international issues in bioethics and human rights for study across social science disciplines. New chapters discuss the reproductive justice in the US, immigration politics and medical duty during pandemics, climate change implications for bioethics, acoustic weaponry technologies and vaccine politics. Following a consideration of theoretical frameworks, there are three units on human rights, life and death and public health, forming an in-depth look at contemporary issues in the field of bioethics. Each unit includes cutting-edge analyses by international experts and thought-provoking case studies as well as discussion and essay prompts and Internet and film resources. Topics range from pediatric genomics, abortion including the Dobbs decision, medical tourism, human experimentation, climate change, the Havana syndrome, the care of aging family members, truth-telling, vulnerable human subjects, health equity, healthcare in ICE detention facilities, solitary confinement, euthanasia, lethal injections and the harvesting of human organs, pandemic ethics, vaccine controversies and more. The new updated and retained chapters make this book an appealing resource as a primary text, scholarly reference book or a course supplement. Contributors: Robert Baker, Tom L. Beauchamp, Michael Boylan, Marlene Brant Castellano, Cher Weixia Chen, Zenon Culverhouse, Bernard Gert, Soren Holm, Ilhan Ilkilic, Akiko Ito, Rita Manning, Kimberly Mutcherson, Peter F. Ethical and Social Issues in the Information Age Joseph M. Kizza, 2007-06-02

Since the publication of the first edition in 1997, there have been tremendous changes in the fields of computer science and information sciences. During this period, we have become more dependent than ever before on computer and telecommunication technology. As we both individually and as nations become more dependent on cyberspace technology, it has itself become a critical component of individual nations' security infrastructures that control power grids, gas and oil storage facilities, transportation and all forms of national communication, including emergency services. The recent rise in cyber attacks, many of them with lightning speed affecting millions of computers worldwide and causing billions of dollars in losses both to individuals and businesses, is an indication of how unprepared we are to handle such attacks, not only today but also in the future. Such attacks are a mark of the poor state of our cyberspace security policies. The facts that there are no signs to indicate there is going to be a slowdown in such attacks and that nations are not doing anything worth calling preventive has heightened the need for an effective strategy to produce responsible professionals who can play an active role in the fight against computer and cyber attacks and vandalism.
