Alice Chen, Gang Chen, 2010-12-12 About 80% of people have the desire to write a book at some point With the advance of computer and printing technology this dream can become a reality One important factor of publishing a book is to create a professional looking book cover This book uses book cover design as a case study to teach you how to use FREE Scribus software instead of expensive professional software like InDesign Photoshop and QuarkXpress to create professional presentations With fewer words and many full color screenshots we walk you step by step through the entire process No prior experience is needed You will learn how to 1 Download all the FREE software needed 2 Put the cover template in correct formats 3 Set up the sheet correctly using units colors RGB or CMYK layers the imported cover template sizes guides bleed area and safety margin 4 Add the background color for the cover with a shape or image frame 5 Add the cover image and author s photo as well as how to handle a fully bleed image 6 Add the titles and text accurately including information on selecting or changing the text color using the text box centering the text aligning different text boxes and rotating the text 7 Add the barcode by extracting the barcode from an EPS file and moving all the barcode elements together or by adding the barcode as a JPEG image file 8 Use Scribus software to create professional presentations such as book covers magazine covers graphic designs posters newsletters renderings and more About the authors Alice Chen is an avid Scribus user She has extensive interest in presentation software and resides in California Gang Chen holds a master s degree from the School of Architecture University of Southern California USC Los Angeles and a bachelor s degree from the School of Architecture South China University of Technology He has over 20 years of professional experience Many of the projects he was in charge of or participated in have been published extensively in Architecture Architectural Record The Los Angeles Times The Orange County Register etc He has worked on a variety of unusual projects including well known large scale healthcare and hospitality projects with over one billion dollars in construction costs award winning school designs highly acclaimed urban design and streetscape projects multifamily housing high end custom homes and regional and neighborhood shopping centers Gang Chen is a LEED AP and a licensed architect in California He is also the internationally acclaimed author for other fascinating books including Building Construction Planting Design Illustrated and the LEED Exam Guide series which includes one guidebook for each of the LEED exams

Architectural Detailing

Patrick Rand, Jason Miller, Edward Allen, 2024-09-24 The industry standard guide to designing well performing buildings Aesthetics are a vital part of good design Great design emerges from a deep understanding of the functionality and constructability of details Good details provide clear complete and correct information to the wide variety of users that need them Architects guide a project from design idea to buildable reality by working with other building industry professionals and creating a set of details that show how things are put together Architectural Detailing systematically describes the principles for designing good architectural

details Using patterns that demonstrate best practices and consistent approaches to design detailing this book teaches why detailing is important what factors shape detailing issues and how to detail a building that meets or exceeds performance requirements Extensive illustrations demonstrate how to design building details that will not leak water or air will control the flow of heat and water vapor will adjust to all kinds of movement and will be easy to construct This fourth edition has been updated to conform to the latest International Building Codes and International Energy Conservation Code requirements and incorporates current knowledge about new material and construction technology including Expanded patterns for sustainability high performance architecture and resilience Examples using panelized or modularized prefabricated building assemblies Complex case studies demonstrating the detailing design process for energy efficient structures Design detailing for maintenance and management of sensitive or weak spots in a building assembly Architectural Detailing helps you bring a building together with a well detailed design that communicates effectively at all levels of the construction process *Green Building Costs* Ming Hu, 2023-08-08 Sustainability has become a driver of innovation in the built environment but the affordability of sustainable building remains a significant challenge This book takes a critical view of the real cost of green building It provides readers with a non biased evaluation based on empirical construction cost data and sheds light on the affordability of sustainable buildings Chapters are presented in three parts The first part lays the foundation to demystify the perception of green buildings being expensive to construct by providing empirical evidence that green buildings even net zero buildings are not necessarily more expensive to build than conventional buildings The second part presents empirical evidence common misperceptions of a higher green building construction cost are debunked The author offers a new framework to explain the construction cost drivers and differences of sustainable buildings the project characteristics and project team characteristics human factors The third part directs the readers attention to the important role that human factors play in controlling and reducing construction costs with a focus on the project design team A lack of skills expertise and experience during the design phase is likely to be the biggest contributor to higher construction costs Empirical analysis case studies on LEED certified buildings and interviews with project teams are used to present a pathway to more affordable green building at the end This will be a crucial resource for students and professionals in architecture engineering construction management and planning and energy policy
