Narrow, Michael B. First, Paul J.

Sirovatka, Darrel A. Regier, 2008-05-20 Written to help identify major gaps in our knowledge of how gender and age affect psychiatric diagnoses and to stimulate much needed research to fill these gaps Age and Gender Considerations in Psychiatric Diagnosis serves as both a valuable short term source for the DSM V Task Force and its disorder specific workgroups and a long term guide for future studies that will contribute to revised psychiatric classifications in these three areas Here 47 experts present findings in three areas of psychiatric research that historically have been neglected but rightfully have received increasing attention in recent years and thus are worthy of investigation into their clinical features etiology and course 1 Significant gender differences in prevalence symptom profiles and risk factors for mental disorders including neurodevelopmental neurophysiological and environmental factors for men and women that cut across diagnostic categories for example the critical importance of gender in how psychiatric illness develops and presents DSM s approach to gender to date and relevant research findings and gaps in the epidemiology etiology and pathophysiology of disorders and the gender related expression of psychopathology including the controversial and complex question of whether DSM should have different diagnostic criteria for men and women 2 Mental disorders in infancy and early childhood including diagnosis and measurement of psychopathology PTSD and social and cognitive factors related to the experience of stress reactive attachment disorder unique in part because of its specificity to early childhood mood and anxiety disorders and difficulties in

diagnosis sleep disorders including two new disorders Night Waking Dysomnia and Sleep Onset Dysomnia feeding disorders including the need to address overeating and overfeeding especially given the alleged U S epidemic of obesity early childhood manifestations of behavior disorders and early symptoms and diagnosis of autism 3 Mental disorders in the elderly such as dementia and depression once considered normal consequences of aging but now understood to represent mental disorders including the need to identify specific brain structure abnormalities biomarkers and the many contributing biological psychosocial and environmental factors of mental illness in late life and to understand their roles in the elderly to better diagnose and monitor disease progression Written for clinicians and researchers alike this thought provoking compendium contributes critical information that helps enhance our understanding of the causes of mental disorders develop effective preventive and treatment interventions and inform future editions of DSM and ICD

New Directions in Failure to Thrive Dennis Drotar, 2012-12-06 Failure to thrive affects the lives of many infants and young children at critical times in their development and represents a significant public health problem in the United States Moreover this condition is invisible and can affect children for long periods of time before it is recognized The long term psychosocial sequelae of failure to thrive have only begun to be recognized but may be more severe than first realized We do know that the costs to society in terms of acute pediatric hospitalization and long term rehabilitation foster care and mental health treatment of young children who present with failure to thrive are considerable Children who are diagnosed with failure to thrive represent a special challenge and opportunity for intervention especially preventive intervention because it is quite possible that many of the long term consequences of this condition on psychological development can be lessened via early recognition and intervention However the potential for preventive intervention in failure to thrive has been limited by the state of the art in scientific knowledge and practice Despite the frequency with which failure to thrive is encountered in ambulatory and inpatient settings there is little scientific information to guide practitioners Research on the causes and consequences of failure to thrive has been very much limited by small sample sizes lack of common definitions and short follow up periods Uncertainties in the science of failure to thrive coincide with the considerable practical difficulties involved in diagnosis and intervention

Diaspora Pride - People, Places, and Things (V4) Indiana Robinson, 2017-07-31 As a nation we should preserve our social memory by honoring those who paved the way for us to exist recognizing those who etched their indelible mark on our lives and remembering those who went to the great beyond before us as expressed in the Salute to the Dearly Departed segment People our regions areas and territories our locales hotspots and hangouts and places we love to visit and events we constantly attend in Places and the happenings and the things that we cherish to death items commodities artifacts and products Things So dear readers enjoy the mind triggers and heart wrenching diggers you will find in this book honouring the 55th year of celebrating Jamaica's independence and the tantalizing trip down memory lane with this unofficial reference resource guide by your side You will recollect who is who people where is where places and what is what things in
