James H. Bunn

100 Diagrams That Changed The World From Earliest Cave Paintings To Innovation Of Ipod Scott Christianson:

100 Diagrams That Changed The World Scott Christianson, 2014-09-25 100 Diagrams That Changed The World is a fascinating collection of the most significant plans sketches drawings and illustrations that have changed the way we think about the world From primitive cave paintings to the complicated DNA double helix drawn by Crick and Watson they chart dramatic breakthroughs in our understanding of the world and its history This fascinating book encompasses everything from the triple spirals found on prehistoric megalithic tombs dating right up to the drawings sent out on the side of space exploration probes Discover Leonardo da Vinci's beautiful technical drawings pre-empting the invention of manned flight Copernicus's bold diagrams that dared to tell us that Earth was not at the centre of the Universe as well as the history of the more everyday diagrams that we now take for granted Every diagram is clearly illustrated and placed into context with very accessible text even for the lay reader Diagrams include Egyptian Book of the Dead Chauvet cave drawings Aztec Calendar sheet music Vitruvian Man Galileo's telescope Hooke's Micrographia the Porphyrian Tree Dunhuang Star Map Newcomen's steam engine the Morse Code Brooks Slave Ship William Playfair's bar chart Thomas Edison's light bulb Nazi propaganda map sewing patterns Feynman Diagrams the DNA double helix IKEA flat pack furniture instructions the World Wide Web schematic Carl Sagan's Pioneer Plaque

The Natural Law of Cycles James H. Bunn, 2017-07-28 The Natural Law of Cycles assembles scientific work from different disciplines to show how research on angular momentum and rotational symmetry can be used to develop a law of energy cycles as a local and global influence Angular momentum regulates small scale rotational cycles such as the swimming of fish in water the running of animals on land and the flight of birds in air Also it regulates large scale rotation cycles such as global currents of wind and water James H Bunn introduces concepts of symmetry balance and angular momentum showing how together they shape the mobile symmetries of animals Chapter 1 studies the configurations of animals as they move in a head first direction Chapter 2 shows how sea animals follow currents and tides generated by the rotational cycles of the earth In chapter 3 Bunn explores the biomechanical pace of walking as a partial cycle of rotating limbs On a large scale angular momentum governs balanced shifts in plate tectonics Chapter 4 begins with an examination of rotational wind patterns in terms of the counter balancing forces of angular momentum The author shows how these winds augment the flights of birds during migrations A final chapter centres on the conservation of energy as the most basic principle of science Bunn argues that in the nineteenth century the unity of nature was seen in the emergent concept of energy not matter as the source of power including the movements of animals and machines In each chapter Bunn features environmental writers who celebrate mobile symmetries This book will interest students naturalists and advocates of the environmental movement

Inventions in the Visual Arts Cory MacPherson, 2016-12-15 Humans have created visual representations of the world since the dawn of man While early painting and sculpture was often rudimentary the history of visual art is characterized by rapid evolution today's artists use high tech tools to share their

vision Inventions in the Visual Arts From Cave Paintings to CAD provides a closer look at the development of cave paintings sculptures sketch books cameras and computer aided design software These inventions have surprising links to one another which the book outlines in chronological order and have forever changed the landscape of art and beyond The Book of Circles Manuel Lima, 2017-05-02 In this follow up to his hugely popular The Book of Trees and Visual Complexity Manuel Lima takes us on a lively tour through millennia of circular information design Three hundred detailed and colorful illustrations from around the world cover an encyclopedic array of subjects architecture urban planning fine art design fashion technology religion cartography biology astronomy and physics all based on the circle the universal symbol of unity wholeness infinity enlightenment and perfection Clay tokens used by ancient Sumerians as a system of recording trade are juxtaposed with logos of modern retailers like Target Venn diagrams are discussed alongside the trefoil biohazard symbol symbols of the Christian trinity and the Olympic rings and a diagram revealing the characteristics of ten thousand porn stars displays structural similarities to early celestial charts placing the earth at the center of the universe Lima's introduction provides an authoritative history of the circle and a preface describes his unique taxonomy of the many varieties of circle diagrams rounding out this visual feast for infographics enthusiasts **Location Technologies in International Context**

Rowan Wilken, Gerard Goggin, Heather Horst, 2019-01-21 Location Technologies in International Context offers the first international account of location technologies in an expanded sense and brings together a range of contributions on these technologies and their various cultures of use within the Global South This collection asks How within the Global South do location technologies differ across national markets geo linguistic communities and cultural contexts What are the contrasting or shared meanings and practices associated with location technologies And what innovative practices and new or reinvigorated theory may emerge from attention to the Global South In exploring these questions the collection contributes to our understanding of social cultural gendered and political relations on a global and local scale Location Technologies in International Context is ideal for a range of disciplines including cultural communication and media studies anthropology sociology and geography new media Internet and mobile studies and informatics and development studies

Decoding Manhattan Antonis Antoniou, Steven Heller, 2021-04-13 Mysteries and folkways of New York City revealed in an entertaining collection of graphic art The life and legend of New York City from the size of its skyscrapers to the ways of its inhabitants is vividly captured in this lively collection of more than 250 maps cross sections owcharts tables board games cartoons and infographics and other unique diagrams spanning 150 years Superstars such as Saul Steinberg Maira Kalman Christoph Niemann Roz Chast and Milton Glaser butt up against the unsung heroes of the popular press in a book that is made not only for lovers of New York but also for anyone who enjoys or works with information design  100

Philosophy as Descartes Found It Brian Copenhaver, 2024-11-30 What was philosophy as Descartes found it around 1620 What was philosophy like before Descartes reformed it after 1637 What features of philosophy did he want to fix and what tools did he use To answer such questions how should philosophers do their work today One answer is surprising that Descartes wrote picture books for example Another is challenging that philosophers in the present would be better students of their discipline's past if they spent less time on past philosophy as they commonly understand it The change would be transformative But big changes have happened in philosophy's past for non philosophical reasons that need attention from philosophers today when oblivion has impeded their study of such changes Attending to understudied causes of philosophical effects will show philosophers how to repair the damage that oblivion has done to their work Mending stories about philosophy begins in this book with Descartes and his predecessors mostly the predecessors on meditation and method Brian Copenhaver examines these familiar topics from a neglected point of view before introducing a different and unfamiliar Descartes the author of the *Discourse and Meditations* as a writer of picture books Three chapters about these topics meditation method and picturing are the practice justified by two theoretical chapters one about how philosophy changes the other about the oblivion that cancels memories of change
