knows at least one language spoken or signed Linguistics is the science of language including the sounds words and
grammar rules Words in languages are finite but sentences are not It is this creative aspect of human language that sets it
apart from animal languages which are essentially responses to stimuli The rules of a language also called grammar are
learned as one acquires a language These rules include phonology the sound system morphology the structure of words
syntax the combination of words into sentences semantics the ways in which sounds and meanings are related and the
lexicon or mental dictionary of words When you know a language you know words in that language However the sounds and
meanings of words are arbitrary For the most part there is no relationship between the way a word is pronounced and its
