**The Book of Circles** Manuel Lima, 2017-05-02 In this follow up to his hugely popular The Book of Trees and Visual Complexity Manuel Lima takes us on a lively tour through millennia of circular information design Three hundred detailed and colorful illustrations from around the world cover an encyclopedic array of subjects architecture urban planning fine art design fashion technology religion cartography biology astronomy and physics all based on the circle the universal symbol of unity wholeness infinity enlightenment and perfection Clay tokens used by ancient Sumerians as a system of recording trade are juxtaposed with logos of modern retailers like Target Venn diagrams are discussed alongside the

trefoil biohazard symbol symbols of the Christian trinity and the Olympic rings and a diagram revealing the characteristics of ten thousand porn stars displays structural similarities to early celestial charts placing the earth at the center of the universe Lima's introduction provides an authoritative history of the circle and a preface describes his unique taxonomy of the many varieties of circle diagrams rounding out this visual feast for infographics enthusiasts [Critical Visualization](#) Peter A. Hall, Patricio Dávila, 2022-12-01 Information may be beautiful but our decisions about the data we choose to represent and how we represent it are never neutral This insightful history traces how data visualization accompanied modern technologies of war colonialism and the management of social issues of poverty health and crime The discussion is based around examples of visualization from the ancient Andean information technology of the quipu to contemporary projects that show the fate of our rubbish and take a participatory approach to visualizing cities This analysis places visualization in its theoretical and cultural contexts and provides a critical framework for understanding the history of information design with new directions for contemporary practice *W. E. B. Du Bois's Data Portraits* The W.E.B. Du Bois Center at the University of Massachusetts Amherst, 2018-11-06 The colorful charts graphs and maps presented at the 1900 Paris Exposition by famed sociologist and black rights activist W E B Du Bois offered a view into the lives of black Americans conveying a literal and figurative representation of the color line From advances in education to the lingering effects of slavery these prophetic infographics beautiful in design and powerful in content make visible a wide spectrum of black experience W E B Du Bois's *Data Portraits* collects the complete set of graphics in full color for the first time making their insights and innovations available to a contemporary imagination As Maria Popova wrote these data portraits shaped how Du Bois himself thought about sociology informing the ideas with which he set the world ablaze three years later in *The Souls of Black Folk*

**Drawing for Product Designers Second Edition** Kevin Henry, 2025-01-30 Designers do far more than visualize new products they are called upon to imagine a future and bring it to life through visuals Whether such futures begin as elaborate maps and diagrams of emerging technology or speculative world building the contemporary designer's skill set must cover the entire spectrum from abstract to representational and from low fidelity to high fidelity visualizations The advent of tablet based sketching VR sketching and hybrids bring new and more intuitive ways of working But confidence in manipulating lines curves and surfaces in space whether flat computer assisted or virtual will remain a coveted skill regardless of where technology leads In this practical guide to both hand and computer drawn design essential principles are outlined so that readers will learn to think in 3D and build complex design ideas that are structurally sound and visually clear Specially created sketches and computer models show how to develop rough sketches into finished illustrations while also explaining how to select the right type of representation for the right purpose This revised edition contains new material on sketching principles working across platforms and hybrid workflows Also new to this edition coverage of UX UI design for smart devices and digital platforms and information on cutting edge technology such as AI tools and intuitive and collaborative VR

*Inventions in the Visual Arts* Cory MacPherson, 2016-12-15

Humans have created visual representations of the world since the dawn of man While early painting and sculpture was often rudimentary the history of visual art is characterized by rapid evolution today s artists use high tech tools to share their vision Inventions in the Visual Arts From Cave Paintings to CAD provides a closer look at the development of cave paintings sculptures sketch books cameras and computer aided design software These inventions have surprising links to one another which the book outlines in chronological order and have forever changed the landscape of art and beyond

**Mission in Marginal Places: The Praxis** Michael Pears, Paul Cloke, 2016-09-01

The second book in the series focuses on participation and practice and discusses a range of ways in which Kingdom centred mission can be embedded in the actually existing realms of activity and need in marginal places The book explores five different realms of practice each presenting opportunities for innovative expressions of incarnational attentiveness to marginalized communities and people It seeks to inspire prayerful and discerning activity that tunes into what Jesus is doing in local places rather than providing any kind of off the shelf checklist of prefigured mission tactics It challenges readers to take their faith praxis beyond orthodox congregational settings and out into the everyday realms of life in marginal places

*The Natural Law of Cycles* James H. Bunn, 2017-07-28

The Natural Law of Cycles assembles scientific work from different disciplines to show how research on angular momentum and rotational symmetry can be used to develop a law of energy cycles as a local and global influence Angular momentum regulates small scale rotational cycles such as the swimming of fish in water the running of animals on land and the flight of birds in air Also it regulates large scale rotation cycles such as global currents of wind and water James H Bunn introduces concepts of symmetry balance and angular momentum showing how together they shape the mobile symmetries of animals Chapter 1 studies the configurations of animals as they move in a head first direction

Chapter 2 shows how sea animals follow currents and tides generated by the rotational cycles of the earth In chapter 3 Bunn explores the biomechanical pace of walking as a partial cycle of rotating limbs On a large scale angular momentum governs balanced shifts in plate tectonics Chapter 4 begins with an examination of rotational wind patterns in terms of the counter balancing forces of angular momentum The author shows how these winds augment the flights of birds during migrations A final chapter centres on the conservation of energy as the most basic principle of science Bunn argues that in the nineteenth century the unity of nature was seen in the emergent concept of energy not matter as the source of power including the movements of animals and machines In each chapter Bunn features environmental writers who celebrate mobile symmetries This book will interest students naturalists and advocates of the environmental movement Communication as Gesture Michael Schandorf, 2019-06-19 This book critiques current assumptions about communication particularly digitally mediated communication by re examining conceptual foundations in rhetoric linguistics semiotics information theory and cybernetics The result is a dimensional account of interaction that is at once both intuitive and revolutionary The Ontology of Physics for Biology Daniel L. Cook, John H. Gennari, Maxwell L. Neal, 2023-12-14 This book introduces semantic representations of multiscale multidomain physiological systems that link to qualitative reasoning and to quantitative analysis of biophysical processes in health and disease Two major public health problems diabetes and hypertension serve as use cases to illustrate the depth and rigor of such representations for logical inference and quantitative analysis Central to this approach is the Ontology of Physics for Biology OPB that formally represents the foundations of classical physics and engineering system dynamics that are the basis for our understanding of biomedical entities processes and functional relationships Furthermore we introduce OPB based software for annotating and abstracting available biosimulation models for reuse recombination and for archiving of physics based biomedical knowledge We have formalized and leveraged physics based biological knowledge as a working view of physiology and biophysics from three distinct perspectives 1 biologists and biomedical investigators 2 biophysicists and bioengineers and 3 biomedical ontologists and informaticists We present a logical and intuitive semantics of classical physics as a tool for mediating and translating biophysical knowledge among biomedical domains Daniel L Cook MD PhD John H Gennari PhD Maxwell L Neal PhD **Location Technologies in International Context** Rowan Wilken, Gerard Goggin, Heather Horst, 2019-01-21 Location Technologies in International Context offers the first international account of location technologies in an expanded sense and brings together a range of contributions on these technologies and their various cultures of use within the Global South This collection asks How within the Global South do location technologies differ across national markets geo linguistic communities and cultural contexts What are the contrasting or shared meanings and practices associated with location technologies And what innovative practices and new or reinvigorated theory may emerge from attention to the Global South In exploring these questions the collection contributes to our understanding of social cultural gendered and political relations on a global and local scale Location Technologies in International Context is
