From Notes to Narrative Kristen Ghodsee,2016-05-10 Ethnography centers on the culture of everyday life So it is ironic that most scholars who do research on the intimate experiences of ordinary people write their books in a style that those people cannot understand In recent years the ethnographic method has spread from its original home in cultural anthropology to fields such as sociology marketing media studies law criminology education cultural studies history geography and political science Yet while more and more students and practitioners are learning how to write ethnographies there is little or no training on how to write ethnographies well *From Notes to Narrative* picks up where methodological training leaves off Kristen Ghodsee an award winning ethnographer addresses common issues that arise in ethnographic writing Ghodsee works through sentence level details such as word choice and structure She also tackles bigger picture elements such as how to incorporate theory and ethnographic details how to effectively deploy dialogue and how to avoid distracting elements such as long block quotations and in text citations She includes excerpts and examples from model

Method Mania Lynne Ecenbarger, 2007-10 Success in school in work and in life can be greatly enhanced by the ability to write effectively And due to the writing process revolution we are gradually improving the quality of writing The writing process focuses on exploring metacognitively what writers actually do throughout a writing task how real writers go about constructing texts Teachers work closely with students helping them to understand writing as a communication and learning process The importance of the creation expression and comprehension of meaning is emphasized throughout the process Because writing is a complex process students need to progress through a number of levels not necessarily in a linear fashion to experience the process Too often students approach writing with a one and done mentality failing to recognize that complex writing cannot be accomplished in a single sitting in a single draft We need to help them realize that successful

writers are reflective about their writing processes and habits learning what procedures work best and adapting them to suit particular situations The best forum for implementing the writing process into the classroom is through a writer s workshop A typical writer s workshop is a block of time scheduled each day for students to work through the steps in the process It is important to remember that writing should extend across the curriculum If a block of writing time can t be scheduled for one day it should be integrated into another subject Writing should be viewed as a means of communicating and emerge naturally out of other activities Teachers should make writing so integral to each lesson that the flow of the class is smooth from mental to verbal to written communication Teachers using the workshop approach do not ignore the product and parts of language Instead the product is considered within the process Grammar and mechanics are taught in the context of use In the past the teaching of formal grammar usually displaced some instruction and practice in actual composition Unfortunately with our overcrowded curriculum teachers can t afford to spend excessive class time on decontextualized grammar exercises that involve little or no actual composition Students should be given daily opportunities to explore writing and create written text for various purposes We know that writing is a powerful tool that can influence others and clarify one s own thoughts Teaching the writing process through the workshop approach can give students the key to unlocking this powerful tool And the activities in this book are designed to help make the process easier for teachers to pick up and implement today You will find over 200 mini lessons designed to stimulate critical and creative thinking that can be applied to written composition in all phases of the writing process Students will continue to recognize that adults who use these activities in the context of authentic literacy lessons are those who are committed to facilitating and promoting only the very best of writers

The Typewriter Century Martyn Lyons, 2021-02-01 This book captures the intensity of the relationship between writers and their typewriters from the 1880s when the machine was first commercialized to the 1980s when word processing superseded it Drawing on examples from the United States Britain Europe and Australia *The Typewriter Century* focuses on celebrity writers including Henry James Jack Kerouac Agatha Christie Georges Simenon and Erle Stanley Gardner who wrote prolifically and mechanically developing routines in which typing handwriting and dictation were each allotted important functions The typewriter de personalized the text the office typewriter bureaucratized it At the same time some authors found a new and disturbing distance between themselves and their compositions while others believed the typewriter facilitated spontaneous and automatic typing *The Typewriter Century* provides a cultural history of the typewriter outlining the ways in which it can be considered an agent of change as well as demonstrating how it influenced all writers canonical and otherwise
