Handbook of Research on Creative Problem-Solving Skill Development in Higher Education Zhou, Chunfang, 2016-09-21 Developing students' creative problem solving skills is paramount to today's teachers due to the exponentially growing demand for cognitive plasticity and critical thinking in the workforce. In today's knowledge economy, workers must be able to participate in creative dialogue and complex problem solving. This has prompted institutions of higher education to implement new pedagogical methods such as problem based and case based education. The *Handbook of Research on Creative Problem Solving Skill Development in Higher Education* is an essential comprehensive collection of the newest research in higher education creativity, problem solving, and pedagogical design. It provides the framework for further research opportunities in these dynamic, necessary fields. Featuring work regarding problem oriented curriculum and its applications and challenges, this book is essential for policy makers, teachers, researchers, administrators, students of

education **Creative Problem Solving for Managers** Tony Proctor, 2014-11-13 Stimulating and developing the creative potential of all members of an organization not just those in the more traditionally creative functions such as design or research and development is widely seen as contributing to performance and results This textbook introduces ideas skills and models to help students understanding how creative thinking can aid problem solving The latest edition of this well regarded book brings the story up to date whilst retaining popular features such as case studies and case histories together with extensive diagrams examples and thought provoking questions New to this edition are sections on thinking styles and types creativity and its role in innovation implementation and software aids to creativity This rounded textbook will continue to be an ideal resource for a range of courses and modules across the business school curriculum including problem solving strategic management creativity and innovation management *Effective Learning in the Life Sciences* David J. Adams, 2011-10-17 Effective Learning in the Life Sciences is intended to help ensure that each student achieves his or her true potential by learning how to solve problems creatively in laboratory field or other workplace setting Each chapter describes state of the art approaches to learning and teaching and will include case studies worked examples and a section that lists additional online and other resources All of the chapters are written from the perspective both of students and academics and emphasize and embrace effective scientific method throughout This title also draws on experience from a major project conducted by the Centre for Bioscience with a wide range of collaborators designed to identify and implement creative teaching in bioscience laboratories and field settings With a strong emphasis on students thinking for themselves and actively learning about their chosen subject Effective Learning in the Life Sciences provides an invaluable guide to making the university experience as effective as possible Environmental Problem Solving Jeffrey W. Hughes, 2013-08-02 As environmental problems become increasingly complex it is critical that students and activists learn the skills with which to address them Although there already are many case studies of actual issues only in the last few years have environmental scientists paid close attention to their resolution Environmental Problem Solving teaches these skills Jeffrey W Hughes creates an organized method for approaching problems understanding larger issues and crafting solutions to a wide range of contemporary environmental issues Many environmental activists often have preconceived ideas of environmental protection and problem solving They react emotionally to news of deforestation a new housing development or a planned big box store without thinking about the problem logically and they may automatically regard foresters development companies and corporations as opponents As their views harden discourse turns acrimonious and it becomes ever more difficult to find satisfactory solutions This book teaches those on both sides of the table to address their own preconceptions and approach hard issues critically methodically and fairly Hughes combines aspects of the decision making process from the fields of business management and communication science based on extensive research and ample practical experience in the field and classroom He creates a logical framework to help guide thinking from identifying a problem to finding its solution Using

examples drawn from real life situations Environmental Problem Solving will become an invaluable guide for environmentalists agency professionals consultants students naturalists and concerned citizens *Enterprise and Organizational Modeling and Simulation* Robert Pergl, Eduard Babkin, Russell Lock, Pavel Malyzhenkov, Vojtěch Merunka, 2019-11-13 This book constitutes the refereed proceedings of the 15th International Workshop on Enterprise and Organizational Modeling and Simulation EOMAS 2019 held in Rome Italy in June 2019 The main focus of EOMAS is on the role importance and application of modeling and simulation within the extended organizational and enterprise context The 12 full papers presented in this volume were carefully reviewed and selected from 25 submissions They were organized in topical sections on conceptual modeling enterprise engineering and formal methods *Proceedings of IAC-TLEI 2015 in Vienna* group of authors, 2015-11-09 Proceedings International Academic Conference on Teaching Learning and E learning in Vienna 2015 **Handbook of Decision Making** Goktug Morcol, 2006-11-01 Handbook of Decision Making includes the wisdom of the long theological and philosophical traditions of human society as well as a systematic exploration of the implications of contemporary evolutionary theories Common patterns in decision making styles are identified as well as the common variations that different contexts may generate The text covers the multiplicity of mainstream decision making styles such as cost benefit analysis and linear programming It also explains alternative and emerging methods such as geographic information systems Q methodology and narrative policy analysis Practical applications are discussed using decision making practices in budgeting public administration and governance drug trafficking and information systems
