Physics Briefs ,1994 **Subject Guide to Books in Print** ,1993 **Handbook of Nuclear Engineering** D. G. Cacuci,2010-09-14 This is an authoritative compilation of information regarding methods and data used in all phases of nuclear engineering Addressing nuclear engineers and scientists at all levels this book provides a condensed reference on nuclear engineering since 1958 *International Books in Print* ,1997 *American Book Publishing Record Cumulative, 1950-1977* R.R. Bowker Company. Department of Bibliography,1978 **Nuclear Science Abstracts** ,1959 **Spin Wave Confinement** Sergej O. Demokritov,2019-05-08 This book presents recent scientific achievements in the investigation of magnetization dynamics in confined magnetic systems Introduced by Bloch as plane waves of magnetization in unconfined ferromagnets spin waves currently play an important role for description of very small systems Spin wave confinement effect was experimentally discovered in the 1990s in permalloy microstripes The diversity of systems where this effect is observed has been steadily growing since then most of which will be addressed in this book The book includes six chapters which originate from different groups of experimentalists and theoreticians dominating the field since the discovery of the effect Different chapters of the book reflect different facets of spin wave confinement providing a comprehensive description of the effect and its place in modern magnetism It will be of value for scientists and engineers working on magnetic storage elements and magnetic logic and is also suitable as an advanced textbook for graduate students Emerging Memory and Computing Devices in the Era of Intelligent Machines Pedram Khalili Amiri,2020-04-16 Computing systems are undergoing a transformation from logic centric towards memory centric architectures where overall performance and energy efficiency at the system level are determined by the density performance functionality and efficiency of the memory rather than the logic sub system This is driven by the requirements of data intensive applications in artificial intelligence autonomous systems and edge computing We are at an exciting time in the semiconductor industry where several innovative device and technology concepts are being developed to respond to these demands and capture shares of the fast growing market for AI related hardware This special issue is devoted to highlighting discussing and presenting the latest advancements in this area drawing on the best work on emerging memory devices including magnetic resistive phase change and other types of memory The special issue is interested in work that presents concepts ideas and recent progress ranging from materials to memory devices physics of switching mechanisms circuits and system applications as well as progress in modeling and design tools Contributions that bridge across several of these layers are especially encouraged Government Reports Index ,1973 Transactions of the American Institute of Electrical Engineers ,1921 *Government Reports Announcements* ,1973 **Scientific and Technical Books and Serials in Print** ,1989 **International Conference on Innovative Computing and Communications** Aboul Ella Hassanien,Oscar Castillo,Sameer Anand,Ajay Jaiswal,2023-07-31 This book includes high quality research papers presented at the Sixth International Conference on Innovative Computing

and Communication ICICC 2023 which is held at the Shaheed Sukhdev College of Business Studies University of Delhi Delhi India on February 17 18 2023 Introducing the innovative works of scientists professors research scholars students and industrial experts in the field of computing and communication the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real time applications
