

MAINTENANCE

GENERAL MAINTENANCE RECOMMENDATIONS

All Ford passenger cars have the following parts filled at the factory with a high-quality lubricant designed for use throughout the life of the vehicle: manual transmission, automatic transmission, power steering reservoir, steering gear housing and rear axle.

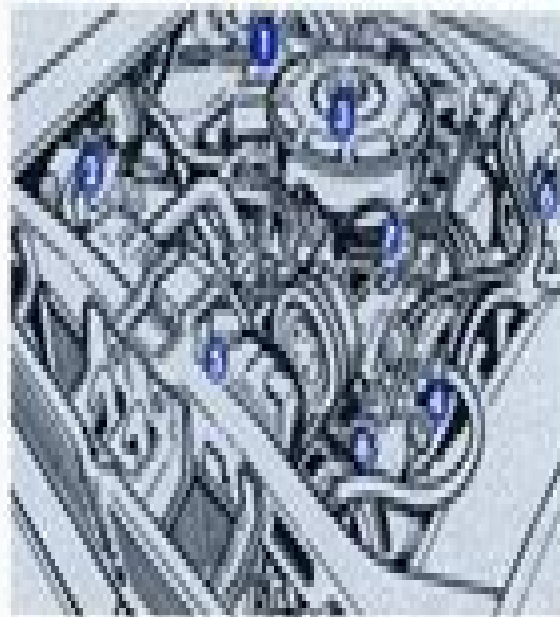

These lifetime lubricants need not be changed in any of these parts. Rather, the lubricant supply should be checked periodically and the proper lubricant "added to" when needed.

Instructions for checking these and other units are contained in the following paragraphs. Locations of the engine-compartment components are shown on this page. Specified lubricants are given on Page 65.

It is recommended that you return to your Ford of Canada Dealer for the maintenance

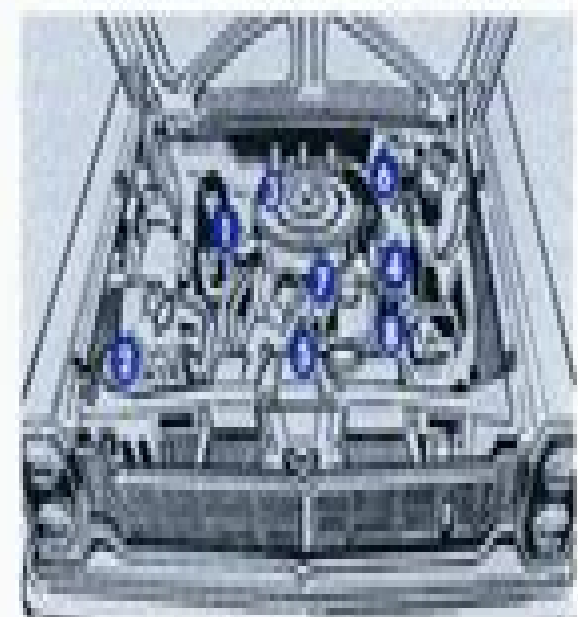

items described in the following pages. Here, you will have the satisfaction of quality workmanship performed by factory-trained

Technicians who use Factory-approved equipment, lubricants, and genuine Ford, FoMoCo and Rotunda parts.
