Neville Dean,Michael G. Hinchey,1996-09-17 As computer systems continue to advance the positions they hold in human society continue to gain power Computers now control the flight of aircraft the cooling systems in chemical plants and feedback loops in nuclear reactors Because of the vital roles these systems play there has been growing concern about the reliability and safety of these advanced computers Formal methods are now widely recognized as the most successful means of assuring the reliability of complex computer systems Because formal methods are being mandated in more and more international standards it is critical that engineers managers and industrial project leaders are well trained and conversant in the application of these methods This book covers a broad range of issues relating to the pedagogy of formal methods The contributors all acknowledged experts have based their contributions on extensive experiences teaching and applying formal methods in both academia and industry The two editors both well known in this area propose various techniques that can help to dismiss myths that formal methods are difficult to use and hard to learn Teaching and Learning Formal Methods will be an indispensable text for educators in the fields of computer science mathematics software engineering and electronic engineering as well as to management and product leaders concerned with training recent graduates Offers proven methods for teaching formal methods even to students who lack a strong background in mathematics Addresses the important role that formal methods play in society and considers their growing future potential

Includes contributions from several pioneers in the area Features a foreword written by Edsger W Dijkstra Descent Directions and Efficient Solutions in Discretely Distributed Stochastic Programs Kurt Marti,2013-11-11 In engineering and economics a certain vector of inputs or decisions must often be chosen subject to some constraints such that the expected costs arising from the deviation between the output of a stochastic linear system and a desired stochastic target vector are minimal In many cases the loss function u is convex and the occurring random variables have at least approximately a joint discrete distribution Concrete problems of this type are stochastic linear programs with recourse portfolio optimization problems error minimization and optimal design problems In solving stochastic optimization problems of this type by standard optimization software the main difficulty is that the objective function F and its derivatives are defined by multiple integrals Hence one wants to omit as much as possible the time consuming computation of derivatives of F Using the special structure of the problem the mathematical foundations and several concrete methods for the computation of feasible descent directions in a certain part of the feasible domain are presented first without any derivatives of the objective function F It can also be used to support other methods for solving discretely distributed stochastic programs especially large scale linear programming and stochastic approximation methods *CliffsNotes AP European History with CD-ROM* Michael J.

Televised Presidential Debates and Public Policy Sidney Kraus,1999-10-01 With this second edition Kraus continues his examination of formal presidential debates considering the experience of television in presidential elections reviewing what has been learned about televised debates and evaluating that knowledge in the context of the election process specifically and the political process generally He also examines the media and the role they occupy in presidential elections Because critics often refer to the Lincoln Douglas debates when reproaching presidential debates comparisons of the two are discussed throughout the book Much of the data and information for this accounting of televised presidential debates comes from the author's first hand experience as one who was involved with these debates as a participant observer on site at nearly all of the debates discussed Throughout these discussions emphasis is placed on the implications for public policy To suggest policy that will be accepted and adopted by politicians and the public is at best difficult Proposals for changes in public policy based on experience even when scientific data support those changes must be subjected to an assessment of the values and predispositions of the proponent These values and predispositions however may not necessarily inhibit the proponent's objectivity As such this review of television use in the presidential election process provides the context for examining televised debates Advanced Placement Examination in Chemistry Frederick J.
