Human Resource Management in the Philippine Context Vivien T. Supangco, Jessica A. Los Baños, Katrina Tala S. Ocampo, 2021 Labor Markets in Asia Jesus Felipe, Rana Hasan, 2006-07-03

This volume argues that while labor market reforms may be necessary in some specific cases, by no means are labor market policies the main explanation for the widespread increase in unemployment and underemployment across Asia. And country-specific studies undermine the case for across-the-board labor market reforms.

Scripts of Servitude Beatriz P. Lorente,2017-10-19 This book examines how language is a central resource in transforming migrant women into transnational domestic workers Focusing on the migration of women from the Philippines to Singapore the book unpacks why and how language is embedded in the infrastructure of transnational labor migration that links migrant sending and migrant receiving countries It sheds light on the everyday lives of transnational domestic workers and how they draw on their linguistic repertoires and in particular on English as they cross geographical and social spaces By showing how the transnational mobility of labor is dependent on the selection and performance of particular assemblages of linguistic resources that index migrants as labor and not as people the book provides a powerful lens with which to examine how migration contributes to relationships of inequality and how such inequalities are produced and challenged on the terrain of language *PNAC Report, 1999-2008* Philippine National AIDS Council,2009 *Forestland Management*

Framework Convention on Climate Change UNFCCC COP 21 demonstrated that there is still much room for improvement in the role played by universities in international negotiations and decision making on climate change To date few scientific meetings have provided multidisciplinary perspectives on climate change in which researchers across the natural and social sciences could come together to exchange research findings and discuss methods relating to climate change mitigation and adaption studies As a result the published literature has also lacked a broad perspective This book fills that gap and is of interest to all researchers and policy makers concerned with global climate change regardless of their area of expertise
